Half Yearly Examination Timetable

Year 7

Day	Exam Time	Course	Length
Monday, 25 May	P1 & 2	Geography	70 minutes (plus 5 minutes reading time)
	P3 – 5	Normal timetable	
Tuesday, 26 May	P1 & 2	Mathematics	70 minutes (plus 5 minutes reading time)
	P3 – 5	Normal timetable	
Wednesday, 27 May	P1 & 2	Science	70 minutes (plus 5 minutes reading time)
	P3 – 5	Normal timetable	
Thursday, 28 May	P1	Normal timetable Year 7 Music students to leave 10 mins early from P1	
	P2	Music	50 minutes (plus 10 minutes set up time)
		Normal Timetable for those who don't do Music	
	P3 – 5	Normal timetable	
Friday, 29 May	P1 – 5	Normal timetable	

Year 8

Day	Exam Time	Course	Length
Monday, 25 May	P1 & 2	Geography or History	70 minutes (plus 5 minutes reading time)
	P3 – 5	Normal timetable	
Tuesday, 26 May	P1 & 2	Mathematics	70 minutes (plus 5 minutes reading time)
	P3 – 5	Normal timetable	
Wednesday, 27 May	P1 & 2	Science	70 minutes (plus 5 minutes reading time)
	P3 – 5	Normal timetable	
Thursday, 28 May	P1 – 5	Normal timetable	
Friday, 28 May	P1 & 2	Normal timetable	
	P3	Music	50 minutes (plus 10 minutes set up time)
		Normal Timetable for those who don't do Music	
	P4 – 5	Normal timetable	

NOTE TO STUDENTS:

- Year 7 meet at the **Learning Stairs** before each examination. Year 8 meet in the **Lecture Theatre** before each examination.
- Exams will be held in the Maths rooms, HSIE rooms and collaboration spaces.
- You must **bring all equipment** with you for the examinations; there is **no borrowing of equipment**.
- All students are to write using a **black pen** only. Bring a number of pens to ensure they do not run out.
- Only **NESA approved calculators** may be used. Check with your Maths teacher. Replace the battery to ensure reliability.
- You may only bring in a **clear water bottle** with no labels.
- Students should go to the bathroom prior to entering the examination room as they will only be able to leave during the exam in exceptional circumstances.
- All writing material must be carried in a **clear sleeve**. No pencil cases.
- **No mobile phones or smart watches** are permitted in the room.
- All end of course Examinations form an integral part of the course delivery for all Stage 4 courses; any **non-serious attempt** for any part of an Examination will be issued with an **Academic Warning** for failing to follow course expectations.

Exam Preparation Guidelines

Create a Planner

Use your notifications as a checklist for the material you need to review.

Look through your class workbook + textbooks + Canvas notes to ensure you know where to find the notes you need to review. Make notes on your notification so that you can come back to each section and know where to find the notes you need.

Follow up with classmates / teachers to access notes that you may have missed if you were absent throughout the year.

Traffic Light Review

As you begin your revision, scan through the module for the notes you need to review. Code your understanding according to your level of confidence with the concepts / skills:

Green = Confident with the material; you could teach this to someone else

Orange = Seems familiar but you need to do some more reading / reviewing to be able to teach someone else these concepts / skills.

Red = I am really confused about this and need to spend dedicated time to re-learn this material.

Begin in your **RED ZONE**. There is little to be gained from hours of study of the material that you are already confident with. Start where you know the least and work up to the most familiar.

Distil Your Notes

You do not have time or energy to rewrite a whole year's worth of notes, nor should you try. Instead, make notes using trigger words, or words that bring back a lot of memories. When you write using trigger words, not only do you end up writing a lot less, but you also remember more from the notes as trigger words bring back a lot of memories. Think of the words you write on your hand – you probably only write 1-2 words to remember a lot of information. Here are some tips for writing your notes in a way that not only saves time, but makes them easier to remember when it comes to studying for a test:

Which notes are easier to memorise?

<u>Stalin & Families</u>	<u>STALIN</u>
<i>Joseph Stalin, when he was the leader of Soviet Russia, encouraged families to be very close and loyal to each other. He encouraged children to be loyal and obedient to their parents, and parents would then be loyal and obedient to their parents. What this meant was that communities were quite harmonious and peaceful which meant there would be less of a chance of any uprising, rebellion or revolution. This is exactly what Stalin wanted as this allowed him to stay in power for longer.</i>	<u>Family – Soviet Russia</u> • Obedient children • Community peace • ↓ rebellion • Stalin keeps power
Regular notes: 88 words	Trigger word notes: 12 words

- Make your **Main Heading** nice and bold – it should be the topic of the page and the first thing you see when you look at the page.
- Make your sub-headings bold (or in their own colour) and put them at the top of a new topic related to the main heading.
- Your **bullet-points** should be only a few words long and focus on keywords – you don't need to write full sentences!
- To help you cut down the number of words you write or type, try drawing or imagining **a line running down the middle** of the page that you don't write past.

Flashcards

To help distill your notes, create flashcards that have a question / answer format. Write a question on one side, write a detailed answer on the other side. Practice writing it out in full complete sentences so that you know how all of the ideas should be expressed.

Next, highlight the key information that you need to remember.

Ask someone to test you - you must name the information that you have highlighted to know that the answer is correct.

You can also create digital flashcards using Quizlet and other online tools to test yourself.

Past Papers

For some subjects (especially Maths), past papers are a helpful way to test yourself across a number of modules. As you work through your textbook to review the module, use the past papers as a guide to how successful you have been to now answering the questions.

Use the Textbook thoroughly!

The beginning of chapters in textbooks typically capture the core of the learning for the module. In Maths, this is where all the concepts are explained and where the reasoning is unpacked. Don't skip these important introductions. Go back and review the notes you may have ignored early in the module. Work through the examples at the beginning of each sub-chapter.

Create Mind Maps

Mind maps are an excellent way to take five pages of notes and distill them down to one page – this makes the notes easier to memorise, and helps you understand how things on different pages of notes tie together. Here are the steps for creating a mind map from a page of notes:

Step 1 - Main idea in the middle

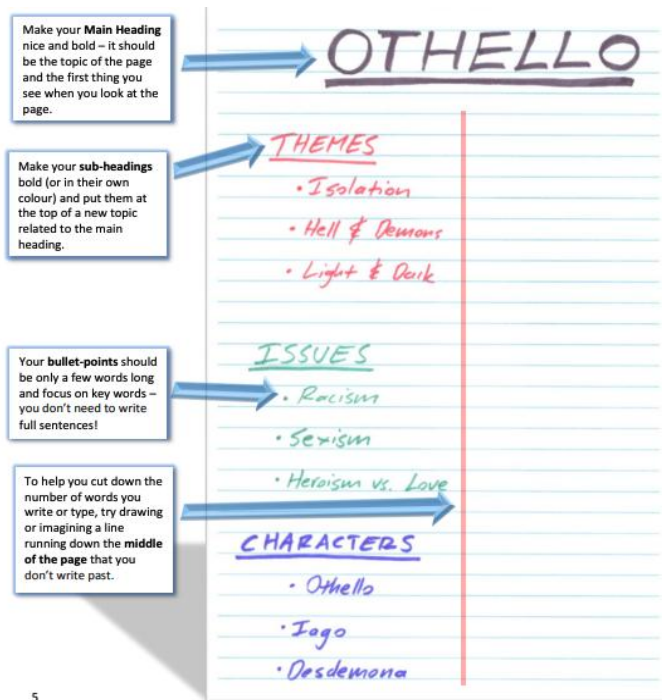

The main topic of your mind map goes in a circle in the middle of the page. For example, in Science this might be something like “cell division” if that is the major topic you are studying at the moment. When you are studying, this should be the very first thing you see when you pick up the page.

Step 2 - Sub-headings branch off the middle

Next, take the sub-headings from your page of notes and have them coming as branches off the centre circle.

Step 3 - Bullet points branch off branches

Once you've completed that, take the bullet points from your sub-headings and have them branch off the subheadings in your notes.

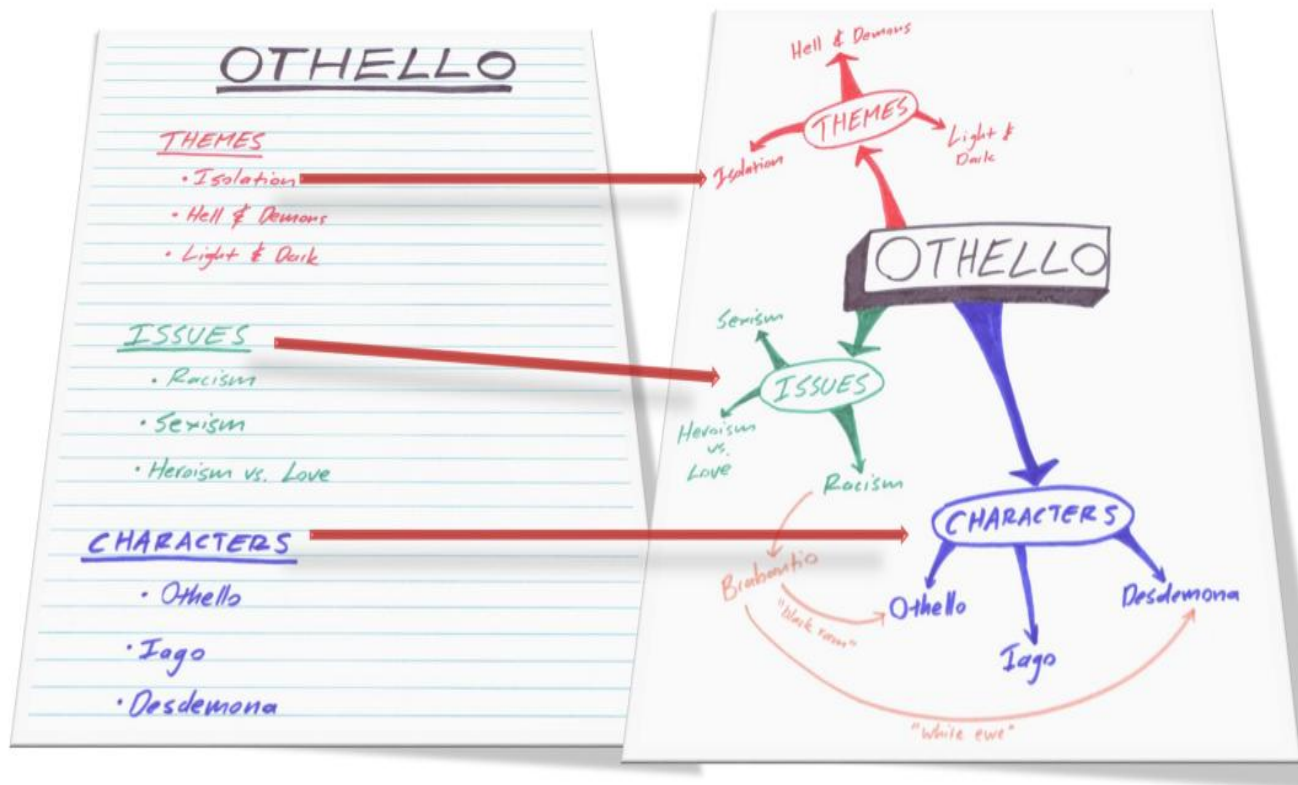

5

Step 4 – Link different branches together

Once you have distilled a few pages of notes into the mind map, have a look for ways you can link them together. For example, you can link different sub-headings together which share a common theme.

Example: turning notes into a mind-map

Year 7 Geography Half Yearly Examination

Assessment Task Number: 2

Weighting: 40%

Exam Length: 70 minutes (plus 5 minutes reading time)

Course Specific Criteria

- Introduction to Geography
- Landscapes and Landforms
- Water in the World

Outcomes

GE4-COM-01	uses concepts and terminology to communicate geographical information for a range of purposes, audiences and contexts
GE4-PER-01	examines and describes the perspectives of people and organisations on a range of geographical issues
GE4-MAN-01	explains the management and protection of places and environments
GE4-DFC-01	locates the diverse features and describes the characteristics of a range of places and environments

BPL Dispositions stretch in exam

To complete this task successfully, you will be required to stretch your **linking** and **reasoning** skills by distilling your knowledge of the course material from Topics 1 and 2.

Examination Components

- The examination will cover the content and skills covered in *Introduction to Geography*, *Landscapes and Landforms*, and *Water in the World* which you have studied during Term 1 and Term 2.
- The examination will be 70 minutes in length and will consist of three sections:
 - Matching terms and definitions, true false questions
 - Short answers
 - Paragraph responses

Year 7 Geography Examination Study Guide

Key Study Strategies:

- Revision of skills, notes, handouts and other resources covered in class.
- Look carefully at the dot points below and ensure you have revised each of them. If you are missing classwork for any of these dot points, please ensure you check Canvas, or ask a friend for a copy of a worksheet and catch up.
- Summarise the content below using study notes, flash cards, mind maps, etc – whichever strategy works best for you to remember the content covered.

In order to prepare for this examination students should focus their study on the following topics:

Introduction To Geography

- BOLTSS
- Direction and bearing
- Scale and distance
- Describing landscapes, elements of landscapes

Landscapes and Landforms

- Introduction to landscapes & landforms
- Types of landscapes
- How landscapes are made
- Shaping landscapes – geomorphic processes
- Value of landscapes

Water in the World

- Types of water resources
- Value of water
- Movement of water through the catchment area

It is suggested that students use/access the following resources:

- Additional handouts and resources you have been given by your class teacher.
- Notes you have taken, PowerPoints and exercises you have completed in class on Canvas.
- Assessment task 1 – read through feedback comments

Please bring a ruler, protractor, calculator, pens, pencils and eraser to the exam

Year 7 Mathematics Core Half Yearly Examination

Assessment Task Number: 1

Weighting: 30%

Exam Length: 70 minutes (plus 5 minutes reading time)

Course Specific Criteria

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification: 15%

Outcomes

MA3-RN-01	applies an understanding of place value and the role of zero to represent the properties of numbers
MA3-AR-01	selects and applies appropriate strategies to solve addition and subtraction problems
MA3-MR-01	selects and applies appropriate strategies to solve multiplication and division problems
MA4-INT-C-01	compares, orders and calculates with integers to solve problems
MA4-ANG-C-01	applies angle relationships to solve problems, including those related to transversals on sets of parallel lines
MA4-FRC-C-01	represents and operates with fractions, decimals and percentages to solve problems
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions

Examination Components

Students will be assessed on the following content:

1. Computation with Integers
2. Angle Relationships
3. Fractions, Decimals and Percentages

Students are welcome to bring a summary sheet into the examination:

- One single piece of A4 paper
- Double sided
- Handwritten only (not typed)

Year 7 Mathematics Core Examination Study Guide

Key Study Strategies:

- Review each topic thoroughly, including all worksheets/resources provided in class, and various textbook resources
- Seek assistance from your teacher when needed
- Engage with the past papers provided to you

In order to prepare for this examination students should focus their study on the following topics:

- Positive and Negative Integers
- Angle Relationships
- Understanding Fractions, Decimals and Percentages

It is suggested that students use/access the following resources:

- Cambridge Chapter Revision Exercises and Topic Tests
- Practice Papers given in class
- Learning Lounge on Thursday afternoon
- YNOT Math Year 7 Playlists: <https://www.youtube.com/channel/UCSJ8VZVxWobHwB4tmL0BiA/playlists>

Year 7 Mathematics Enrichment Half Yearly Examination

Assessment Task Number: 1

Weighting: 30%

Exam Length: 70 minutes (plus 5 minutes reading time)

Course Specific Criteria

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification 15%

Outcomes

MA4-INT-C-01	compares, orders and calculates with integers to solve problems
MA3-AR-01	selects and applies appropriate strategies to solve addition and subtraction problems
MA3-MR-01	selects and applies appropriate strategies to solve multiplication and division problems
MA4-INT-C-01	compares, orders and calculates with integers to solve problems
MA4-FRC-C-01	represents and operates with fractions, decimals and percentages to solve problems
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly
MA3-RN-01	applies an understanding of place value and the role of zero to represent the properties of numbers

BPL Dispositions

Examination Components

Students will be assessed on the following content:

1. Computation with Integers
2. Angle Relationships
3. Fractions, Decimals, Percentages and Financial Mathematics

Students are welcome to bring a summary sheet into the examination:

- One single piece of A4 paper
- Double sided
- Handwritten only (not typed)

Year 7 Mathematics Enrichment Study Guide

Key Study Strategies:

- Reviewing each topic thoroughly, this includes all worksheets/resources provided in class, and various textbook resources.
- Seeking assistance from your teacher when needed.
- Engaging with the past papers provided to you.

To prepare for this examination students should focus their study on the following topics:

- Positive and Negative Integers
- Angle Relationships
- Understanding and Applying Fractions, Decimals and Percentages

It is suggested that students use/access the following resources:

- YNOT Math Playlists: <https://www.youtube.com/channel/UCSJj8VZVxWobHWB4tmL0BiA/playlists>
- Cambridge Chapter Revision Exercises and Topic Tests
- Learning Lounge on Thursday Afternoon
- Eddie Woo Playlists
- Practice Papers given in class

Year 7 Mathematics Numeracy Half Yearly Examination

Assessment Task Number: 1

Weighting: 30%

Exam Length: 70 minutes (plus 5 minutes reading time)

Course Specific Criteria

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification: 15%

Outcomes

MA3-RN-01	applies an understanding of place value and the role of zero to represent the properties of numbers
MA3-AR-01	selects and applies appropriate strategies to solve addition and subtraction problems
MA3-MR-01	selects and applies appropriate strategies to solve multiplication and division problems
MA4-INT-C-01	compares, orders and calculates with integers to solve problems
MA4-ANG-C-01	applies angle relationships to solve problems, including those related to transversals on sets of parallel lines
MA4-FRC-C-01	represents and operates with fractions, decimals and percentages to solve problems
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions

Examination Components

Students will be assessed on the following content:

1. Computation with Integers
2. Angle Relationships
3. Fractions, Decimals and Percentages

Students are welcome to bring a summary sheet into the examination:

- One single piece of A4 paper
- Double sided
- Handwritten only (not typed)

Year 7 Mathematics Numeracy Examination Study Guide

Key Study Strategies:

- Review each topic thoroughly, including all worksheets/resources provided in class, and various textbook resources
- Seek assistance from your teacher when needed
- Engage with the past papers provided to you

In order to prepare for this examination students should focus their study on the following topics:

- Positive and Negative Integers
- Angle Relationships
- Understanding Fractions, Decimals and Percentages

It is suggested that students use/access the following resources:

- Cambridge Gold Chapter Revision Exercises and Topic Tests
- Practice Papers given in class
- Learning Lounge on Thursday afternoon
- YNOT Math Year 7 Playlists: <https://www.youtube.com/channel/UCSJ8VZVxWobHwB4tmL0BiA/playlists>

Year 7 Music Half Yearly Examination

Assessment Task Number:**Weighting:** 35%**Exam Length:** 50 minutes (plus 10 minutes setting up time)**Course Specific Criteria** Listening 35%**Outcomes**

MU4-LIS-01	uses listening skills to describe music in relation to stylistic, cultural, historical or social contexts and the elements of music
-------------------	---

BPL Dispositions**Examination Components**

Students will be assessed on the following content:

- Elements of Music: Pitch, Duration, Structure and Dynamics. This will be assessed through listening to Musical examples.
- Demonstrate an understanding of specific music structures – Verse/Chorus Form, Ternary and Binary Form.
- Aurally identify rhythmic patterns.
- Identify and define specific time signatures – 2/4, 3/4 and 4/4.
- Identify and define specific Tempo markings – Largo, Adagio, Andante, Moderato, Allegro and Presto.
- Identify the melodic Contour of a melody.
- Know how to write the Major scale and its formula.
- Understand Tones and semitones.
- Identify and define the different Dynamics – ff, f, mf, mp, p, pp.

Examination Requirements

Students are required to bring their laptop into the examination; it must be fully charged.

Year 7 Music Examination Study Guide

Key Study Strategies:

- Be familiar with the terms/vocabulary relevant to the Elements of Pitch, Duration, Structure and Dynamics.
- Revise both class work and worksheets making sure you understand all work.
- Practice listening to music of your choice and identify the Formal structure of the song, Time signature, Tempo and Dynamics.

Year 7 Science Half Yearly Examination

Assessment Task Number: 2

Weighting: 30%

Exam Length: 70 minutes (plus 5 minutes reading time)

Course Specific Criteria

Knowledge & Understanding 20%

Skills 10%

Outcomes

SC4-OTU-01	explains how observations are used by scientists to increase knowledge and understanding of the Universe
SC4-FOR-01	describes the effects of forces in everyday contexts
SC4-WS-05	uses a variety of ways to process and represent data
SC4-WS-08	communicates scientific concepts and ideas using a range of communication forms

BPL Dispositions

To complete this task successfully, you will be required to rehearse your skills of **planning and focusing**, to stretch **reviewing**, as you draw upon your knowledge and skills of the topics included in this assessment task.

Examination Components

This examination is designed to allow you to show your understanding and comprehension of the materials covered by class work, home learning and practical work. The content being examined covers topics including **Observing the Universe**, the start of the **Forces** unit, as well as **science skills**.

This examination consists of multiple-choice questions and short answer questions which could include such questions as defining, describing, and explaining, as well as drawing diagrams, interpreting graphs and applying knowledge and science skills, etc.

All answers are to be written on the examination paper.

Section I: Multiple Choice – 20 questions

Section II: Short Answer

Year 7 Science Study Guide

Key Study Strategies:

- Be familiar with the terms/vocabulary relevant to the topics covered by revising class notes, handouts, worksheets and relevant materials.
- Make summary notes.
- Read through the relevant modules in Canvas and answer questions.
- Review using learning tasks set specifically for the topic covered by referring to Canvas, workbook and textbook.
- Revise practical activities.
- Practice drawing, reading and interpreting graph and graphical information.
- Revise all the new terminology (create palm cards of scientific terms) and put the terms into sentences.
- Practice answering questions under exam conditions i.e. using time limits for questions approximately 1.5 minutes per mark.

In order to prepare for this examination students should focus their study on the following topics:

Unit	Lesson Sources
Observing the Universe	Canvas 2026 Term 1 Week 1- 9 and Term 2 Week 1 Textbook – Good Science Focus Area 1 Observing the Universe
Force	Canvas 2026 Term 2 Week 2-5 Textbook – Good Science Focus Area 2 Forces
Science Skills	Graphing and interpreting graphs, data analysis

It is recommended that students use/access the following resources:

- Canvas lessons
- Good Science textbook
- Notes, handouts and worksheets

Year 8 Geography Half Yearly Examination

Assessment Task Number: 2

Weighting: 50%

Exam Length: 70 minutes (plus 5 minutes reading time)

Course Specific Criteria

- Geographical Map Skills
- Water in the World
- Interconnections

Outcomes

GE4.3	explains how interactions and connections between people, places and environments result in change.
GE4.7	acquires and processes geographical information by selecting and using geographical tools for inquiry.
GE4.8	communicates geographical information using a variety of strategies.

BPL Dispositions

To complete this task successfully, you will be required to stretch your **linking** and **reasoning** skills to demonstrate your knowledge of the course material from this semester.

Examination Components

- The examination will cover the content and skills covered in Geographical Skills, Water in the World and Interconnections, which you have studied during this semester.
- The examination will be 70 minutes in length and will consist of three sections:
 1. Multiples choice answers
 2. Short answers
 3. Extended response

Geographical Skills will be integrated throughout the examination.

Please bring a ruler, pencil, eraser, protractor and calculator to the exam.

Year 8 Geography Examination Study Guide

Key Study Strategies:

- Revision of skills, notes, handouts and other resources covered in class.
- Look carefully at the dot points below and ensure you have revised each of them. If you are missing classwork for any of these dot points, please ensure you check Canvas, or ask a friend for a copy of a worksheet and catch up.
- Summarise the content below using study notes, flash cards, mind maps, etc – whichever strategy works best for you to remember the content covered.

To prepare for this examination students should focus their study on the following topics:

Geographical Skills (please refer to Canvas pages, classwork and revision worksheets)

- Map Skills including types of maps, BOLTSS, direction, bearing, scale, distance
- Synoptic charts
- Climate Graphs

Water in the World (please refer to these lessons on Canvas)

- The Water Cycle
- Water Catchments
- Water Availability
- Value of Water

Interconnections (please refer to these lessons on Canvas)

- Impacts of Travel and Tourism
- Interconnections of Technology

It is suggested that students use/access the following resources:

- Map skills worksheets
- Additional handouts and resources you have been given by your class teacher.
- Notes you have taken and exercises you have completed in class on Canvas.
- Canvas pages on all three sections of content.

Please bring a ruler, pencil, eraser, protractor and calculator to the exam

Year 8 History Half Yearly Examination

Assessment Task Number: 2

Weighting: 50%

Exam Length: 70 minutes (plus 5 minutes reading time)

Course Specific Criteria

- Medieval Europe
- Shogun Japan
- Source Analysis

Outcomes

HT4.2	describes major periods of historical time and sequences events, people and societies from the past
HT4.4	describes and explains the causes and effects of events and developments of past societies over time
HT4.6	uses evidence from sources to support historical narratives and explanations
HT4.7	identifies and describes different contexts, perspectives and interpretations of the past
HT4.9	uses a range of historical terms and concepts when communicating an understanding of the past
HT4.10	selects and uses appropriate oral, written, visual and digital forms to communicate about the past

BPL Dispositions stretch in exam

To complete this task successfully, you will be required to stretch your **linking** and **reasoning** skills to **communicate** your knowledge of the course material from this semester.

Examination Components

- The examination will cover the content covered in the topics Medieval Europe & Japan Under the Shoguns. It will also cover source analysis skills.
- The examination will be 70 minutes in length and will consist of three sections:
 - Multiple Choice
 - Short Answer
 - Extended Response
- You will be assessed on your ability to:
 - Use Historical terms and concepts
 - Interpret source material
- Analyse sources for usefulness
 - Sequence historical events

Year 8 History Examination Study Guide

Key Study Strategies:

- Revise the relevant Canvas modules
- Revision of source skills: notes, handouts and other resources covered in class.
- Look carefully at the points below and ensure you have revised each of them. If you are missing classwork for any of these points, please ensure you see your teacher and catch up.

In order to prepare for this examination students should focus their study on the following topics:

Medieval Europe:

- Feudalism (social hierarchy in Europe)
- Everyday Life (including Health and Hygiene)
- Crime and Punishment
- The Church
- The Crusades
- Castles

Shogun Japan:

- Geography
- Feudalism (social hierarchy in Japan)
- Everyday Life
- Religion

Primary and Secondary Source Analysis

- Using scaffolds to analyse sources
- Consider the usefulness of sources

It is suggested that students use/access the following resources:

- Canvas Course content
- Class worksheets/activities completed in class
- Summarise the topics above using study notes, flash cards, mind-maps, create recordings of notes, etc.

Year 8 Mathematics Numeracy Half Yearly Examination

Assessment Task Number: 1

Weighting: 30%

Exam Length: 70 minutes (plus 10 minutes reading time)

Course Specific Criteria

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification 15%

Outcomes

MA4-FRC-C-01	represents and operates with fractions, decimals and percentages to solve problems
MA4-LEN-C-01	applies knowledge of the perimeter of plane shapes and the circumference of circles to solve problems
MA4-PYT-C-01	applies Pythagoras' theorem to solve problems in various contexts
MA4-ARE-C-01	applies knowledge of area and composite area involving triangles, quadrilaterals and circles to solve problems
MA4-ALG-C-01	generalises number properties to operate with algebraic expressions including expansion and factorisation
MA4-IND-C-01	operates with primes and roots, positive-integer and zero indices involving numerical bases and establishes the relevant index laws
MA4-VOL-C-01	applies knowledge of volume and capacity to solve problems involving right prisms and cylinders
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions

Examination Components

- Measurement and Pythagoras' theorem
- Algebraic Techniques and Indices
- Fractions, Decimals and Percentages

Students are welcome to bring a summery sheet into the examination:

- One single piece of A4 paper
- Double sided
- Handwritten only (not typed)
- An approved scientific calculator will be needed for the examination

Year 8 Mathematics Numeracy Examination Study Guide

Key Study Strategies:

- Reviewing each topic thoroughly, this includes all worksheets/resources provided in class, chapter review and topic tests in your textbook.
- Seeking assistance from your teacher when needed.
- Engaging with the outcomes being assessed in the table above
- Write two A4, double sided, handwritten summary sheet which may be brought into the examination.

To prepare for this examination students should focus their study on the following topics:

Textbook: CambridgeMaths 8 Gold Stage 4

- Algebraic techniques and indices
- Measurement and Pythagoras' theorem
- Fractions, decimals, percentages, and financial mathematics

It is suggested that students use/access the following resources:

- YNOT Math Playlists: <https://www.youtube.com/channel/UCSJJ8VZVxWobHWB4tmL0BiA/playlists>
- Cambridge Chapter Revision Exercises and Topic Tests
- Learning Lounge on Thursday after school
- Eddie Woo Playlists
- Practice Papers given in class

Year 8 Mathematics Core Half Yearly Examination

Assessment Task Number: 1

Weighting: 30%

Exam Length: 70 minutes (plus 5 minutes reading time)

Course Specific Criteria

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification 15%

Outcomes

MA4-FRC-C-01	represents and operates with fractions, decimals and percentages to solve problems
MA4-LEN-C-01	applies knowledge of the perimeter of plane shapes and the circumference of circles to solve problems
MA4-PYT-C-01	applies Pythagoras' theorem to solve problems in various contexts
MA4-ARE-C-01	applies knowledge of area and composite area involving triangles, quadrilaterals and circles to solve problems
MA4-ALG-C-01	generalises number properties to operate with algebraic expressions including expansion and factorisation
MA4-IND-C-01	operates with primes and roots, positive-integer and zero indices involving numerical bases and establishes the relevant index laws
MA4-VOL-C-01	applies knowledge of volume and capacity to solve problems involving right prisms and cylinders
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions

Examination Components

- Measurement and Pythagoras' theorem
- Algebraic Techniques and Indices
- Fractions, Decimals and Percentages

Students are welcome to bring a summery sheet into the examination:

- One single piece of A4 paper
- Double sided
- Handwritten only (not typed)
- An approved scientific calculator will be needed for the examination

Year 8 Mathematics Core Examination Study Guide

Key Study Strategies:

- Review each topic thoroughly, including all worksheets/resources provided in class, and various textbook resources
- Seek assistance from you teacher when needed
- Engage with the past papers provided to you

To prepare for this examination students should focus their study on the following topics:

(Textbook: Cambridge 8 Stage 4):

- Measurement and Pythagoras' theorem
- Algebraic Techniques and Indices
- Fractions, Decimals, Percentages and Finance

It is suggested that students use/access the following resources:

- YNOT Math Playlists: <https://www.youtube.com/channel/UCSJJ8VZVxWobHwB4tmL0BiA/playlists>
- Cambridge Chapter Revision Exercises and Topic Tests
- Learning Lounge on Thursday after school
- Eddie Woo Playlists
- Practice Papers given in class

Year 8 Mathematics Enrichment Half Yearly Examination

Assessment Task Number: 1

Weighting: 30%

Exam Length: 70 minutes (plus 5 minutes reading time)

Course Specific Criteria

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification 15%

Outcomes

MA4-FRC-C-01	represents and operates with fractions, decimals and percentages to solve problems
MA4-LEN-C-01	applies knowledge of the perimeter of plane shapes and the circumference of circles to solve problems
MA4-PYT-C-01	applies Pythagoras' theorem to solve problems in various contexts
MA4-ARE-C-01	applies knowledge of area and composite area involving triangles, quadrilaterals and circles to solve problems
MA4-ALG-C-01	generalises number properties to operate with algebraic expressions including expansion and factorisation
MA4-IND-C-01	operates with primes and roots, positive-integer and zero indices involving numerical bases and establishes the relevant index laws
MA4-VOL-C-01	applies knowledge of volume and capacity to solve problems involving right prisms and cylinders
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions

Examination Components

1. Measurement and Pythagoras' theorem
2. Algebraic Techniques and Indices
3. Fractions, Decimals, Percentages and Finance

Students are welcome to bring a summery sheet into the examination:

- One single piece of A4 paper
- Double sided
- Handwritten only (not typed)
- An approved scientific calculator will be needed for the examination

Year 8 Mathematics Enrichment Examination Study Guide

Key Study Strategies:

- Review each topic thoroughly, including all worksheets/resources provided in class, and various textbook resources
- Seek assistance from you teacher when needed
- Engage with the past papers provided to you

To prepare for this examination students should focus their study on the following topics:

- Measurement and Pythagoras' theorem
- Algebraic Techniques and Indices
- Fractions, Decimals, Percentages and Finance

It is suggested that students use/access the following resources:

- YNOT Math Playlists: <https://www.youtube.com/channel/UCSJj8VZVxWobHwB4tmL0BiA/playlists>
- Cambridge Chapter Revision Exercises and Topic Tests
- Learning Lounge on Thursday after school
- Eddie Woo Playlists
- Practice Papers given in class

Year 8 Mathematics Accelerated (9 Adv) Half Yearly Examination

Assessment Task Number: 2

Weighting: 30%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification 15%

Outcomes

MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-IND-P-01	applies the index laws to operate with algebraic expressions involving negative-integer indices
MA5-IND-P-02	describes and performs operations with surds and fractional indices
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA5-ALG-C-01	simplifies algebraic fractions with numerical denominators and expands algebraic expressions
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA5-EQU-P-01	solves monic quadratic equations, linear inequalities and cubic equations of the form
MA5-EQU-P-02	solves linear equations of more than 3 steps, monic and non-monic quadratic equations, and linear simultaneous equations
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools
MA5-LIN-C-02	graphs and interprets linear relationships using the gradient/slope-intercept form
MA5-LIN-P-01	describes and applies transformations, the midpoint, gradient/slope and distance formulas, and equations of lines to solve problems
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions stretched in this exam

Examination Components

This examination will include content from:

- Indices and Surds
- Expressions, Equations and Inequalities
- Linear Relationships

Year 8 Mathematics Accelerated (9 Adv) Examination Study Guide

Key Study Strategies:

- Revise your notes, home learning, worksheets and worked examples done in class
- Revise exercise questions in the textbook
- Use resources such as Atomi, Khan Academy or Eddie Woo videos
- Attend Learning Lounge for additional support
- Seek help as early as possible, do NOT leave it until the night before the exam

In order to prepare for this examination students should focus their study on the following topics:

- Indices and Surds
- Expressions, Equations and Inequalities
- Linear Relationships

It is suggested that students use/access the following resources:

- YNOT Math Playlists: <https://www.youtube.com/channel/UCSJJ8VZVxWobHwB4tmL0BiA/playlists>
- Cambridge Chapter Revision Exercises and Topic Tests
- Learning Lounge on Thursday after school
- Eddie Woo Playlists
- Practice Papers given in class

Year 8 Music Half Yearly Examination

Assessment Task Number: 3

Weighting: 35%

Exam Length: 50 minutes (plus 10 minutes setting up time)

Course Specific Criteria Listening 35%

Outcomes

MU4-LIS-01	uses listening skills to describe music in relation to stylistic, cultural, historical or social contexts and the elements of music
-------------------	---

BPL Dispositions

Examination Components

Students will be assessed on the following content:

- Elements of Music: Pitch, Duration, Structure, Timbre and Dynamics. This will be assessed through listening to Musical examples of both Film and Rock Music.
- Demonstrate an understanding of specific music Structures – Binary, Twelve Bar Blues, Verse/Chorus.
- Understanding and identifying a Walking Bass.
- Complete both rhythmic and melodic dictations.
- Identify and define specific time signatures – 2/4, 3/4 and 4/4.
- Identify and define specific Tempo markings – Largo, Adagio, Andante, Moderato, Allegro and Presto.
- Know how to write the Major and Natural and Harmonic Minor scales and their formula's.
- Understand Tones and semitones and how you use them to construct a scale and a chord.
- Identify and define the different Dynamics – ff, f, mf, mp, p, pp.

Examination Requirements

- Students are required to bring their laptop into the examination; it must be fully charged.

Year 8 Music Examination Study Guide

Key Study Strategies:

- Be familiar with the terms/vocabulary relevant to the Elements of Pitch, Duration, Structure, Timbre and Dynamics.
- Revise all class work including both written notes and worksheets.
- Practice listening to music of your choice within the genre of Film and Rock Music and identify the Formal structure of the song, Time signature, Tempo, Timbre and Dynamics.
- Revise how to write the Major and Natural and Harmonic Minor scales and their formula's.
- Revise chords and chord construction.

Year 8 Science Half Yearly Examination

Assessment Task Number: 2

Weighting: Non-weighted

Exam Length: 70 minutes (plus 5 minutes reading time)

Outcomes

SC4-11PW	Discusses how scientific understanding and technological developments have contributed to finding solutions involving energy transfers and transformations
SC4-14LW	relates the structure and function of living things to their classification, survival and reproduction
SC4-15LW	explains how new biological evidence changes people's understanding of the world
7WS	Processes and analyses data from a first-hand investigation and secondary sources to identify trends, patterns and relationships, and draw conclusions

BPL Dispositions

Examination Components

Section 1: Multiple Choice

Section 2: Short Answers

Year 8 Science Examination Study Guide

Key Study Strategies:

- Revise class notes and worksheets and make summary notes
- Complete topics, quizzes and topic tests on Stile
- Revise practical activities
- Practice drawing, reading and interpreting graph and graphical information
- Revise all the new terminology and put the terms into sentences

In order to prepare for this examination students should focus their study on the following topics:

Unit	Chapter Number/Name	Source
Science Skills		
Science equipment and Scientific Method, including graphing skills		Canvas page
Physiology 101		
Cells and Body Systems Digestive System Circulatory System Respiratory System Musculo-Skeletal System Excretory System Reproductive System	<u>Stile</u> (Lesson AND Quizzes) 1.1 The Digestive System 3.1 The Circulatory System 2.1 The Respiratory System 5.1 The Excretory System	stileapp.com
Energy Transformations		
Types of Energy Transfers and Transformations Conduction, Convection and Radiation	<u>Stile</u> (Lesson AND Quizzes) 1.2 Forms of energy 1.3 Defining energy and its units 2.2 Kinetic Energy 2.4 Potential Energy Energy 3.1 Energy Transfer and Transformation	stileapp.com

It is suggested that students use/access the following resources:

- Resources on Canvas
- Notebook notes and handouts/worksheets
- Revision sheets provided by teacher
- Review topic tests and feedback given through the course
- Stile

Note: If you are having difficulty accessing these resources, please ask your teacher.
