Half Yearly Examination Timetable

Year 9

Day	Exam Time	Course	Length
Monday, 25 May	P1 & 2	Normal timetabled classes with provision time for study	
	P3 & 4	Geography	90 minutes (5 minutes reading time)
	P5	Normal Timetable	
Tuesday, 26 May	P1 & 2	Normal timetabled classes with provision time for study	
	P3 & 4	Mathematics	90 minutes (10 minutes reading time)
	P5	Normal Timetable	
Wednesday, 27 May	P1 & 2	Normal timetabled classes with provision time for study	
	P3 & 4	Science	90 minutes (5 minutes reading time)
	P5	Normal Timetable	
Thursday, 28 May	P1 & 2	Normal Timetable	
	P3 & 4	Commerce	90 minutes (5 minutes reading time)
		All other students Normal Timetable	
	P5	Normal Timetable	
Friday, 29 May	P1 & 2	Elective Music Elective History	90 minutes (5 minutes reading time)
		All other students Normal Timetable	
	P3 – 5	Normal Timetable	

Year 10

Day	Exam Time	Course	Length
Monday, 25 May	P1 & 2	Normal timetabled classes with provision time for study	
	P3 & 4	Geography	90 minutes (5 minutes reading time)
	P5	Normal Timetable	
Tuesday, 26 May	P1 & 2	Normal timetabled classes with provision time for study	
	P3 & 4	Mathematics	90 minutes (10 minutes reading time)
	P5	Normal Timetable	
Wednesday, 27 May	P1 & 2	Normal timetabled classes with provision time for study	
	P3 & 4	Science	90 minutes (5 minutes reading time)
	P5	Normal Timetable	
Thursday, 28 May	P1 & 2	Normal Timetable	
	P3 & 4	Commerce	90 minutes (5 minutes reading time)
		All other students Normal Timetable	
	P5	Normal Timetable	
Friday, 29 May	P1 & 2	Elective Music Elective History	90 minutes (5 minutes reading time)
		All other students Normal Timetable	
	P3 – 5	Normal Timetable	

NOTE TO STUDENTS:

- Year 10 meet in the **Lecture Theatre** before each examination. Year 9 meet at the **Learning Stairs** before each examination.
- Exams will be held in the Maths rooms, HSIE rooms and collaboration spaces.
- You must **bring all equipment** with you for the examinations; there is **no borrowing of equipment**.
- All students are to write using a **black pen** only. Bring a number of pens to ensure they do not run out.
- Only **NESA approved calculators** may be used. Check with your Maths teacher. Replace the battery to ensure reliability.
- You may only bring in a **clear wattle bottle** with no labels.
- Students should go to the bathroom prior to entering the examination room as they will only be able to leave during the exam in exceptional circumstances.
- All writing material must be carried in a **clear sleeve**. No pencil cases.
- **No mobile phones or smart watches** are permitted in the room.
- All Half Yearly Examinations form an integral part of the course delivery for all Stage 5 courses; any **non-serious attempt** for any part of an Examination will be issued with an **Academic Warning** for failing to follow course expectations.
- If you do not have an exam, please go to your normal scheduled classes.

Exam Preparation Guidelines

Create a Planner

Use your notifications as a checklist for the material you need to review.

Look through your class workbook + textbooks + Canvas notes to ensure you know where to find the notes you need to review. Make notes on your notification so that you can come back to each section and know where to find the notes you need.

Follow up with classmates / teachers to access notes that you may have missed if you were absent throughout the year.

Traffic Light Review

As you begin your revision, scan through the module for the notes you need to review. Code your understanding according to your level of confidence with the concepts / skills:

Green = Confident with the material; you could teach this to someone else

Orange = Seems familiar but you need to do some more reading / reviewing to be able to teach someone else these concepts / skills.

Red = I am really confused about this and need to spend dedicated time to re-learn this material.

Begin in your **RED ZONE**. There is little to be gained from hours of study of the material that you are already confident with. Start where you know the least and work up to the most familiar.

Distil Your Notes

You do not have time or energy to rewrite a whole year's worth of notes, nor should you try. Instead, make notes using trigger words, or words that bring back a lot of memories. When you write using trigger words, not only do you end up writing a lot less, but you also remember more from the notes as trigger words bring back a lot of memories. Think of the words you write on your hand – you probably only write 1-2 words to remember a lot of information. Here are some tips for writing your notes in a way that not only saves time, but makes them easier to remember when it comes to studying for a test:

Which notes are easier to memorise?

<u>Stalin & Families</u>	<u>STALIN</u>
<i>Joseph Stalin, when he was the leader of Soviet Russia, encouraged families to be very close and loyal to each other. He encouraged children to be loyal and obedient to their parents, and parents would then be loyal and obedient to their parents. What this meant was that communities were quite harmonious and peaceful which meant there would be less of a chance of any uprising, rebellion or revolution. This is exactly what Stalin wanted as this allowed him to stay in power for longer.</i>	<u>Family – Soviet Russia</u> • Obedient children • Community peace • ↓ rebellion • Stalin keeps power
Regular notes: 88 words	Trigger word notes: 12 words

- Make your **Main Heading** nice and bold – it should be the topic of the page and the first thing you see when you look at the page.
- Make your sub-headings bold (or in their own colour) and put them at the top of a new topic related to the main heading.
- Your **bullet-points** should be only a few words long and focus on keywords – you don't need to write full sentences!
- To help you cut down the number of words you write or type, try drawing or imagining **a line running down the middle** of the page that you don't write past.

Flashcards

To help distill your notes, create flashcards that have a question / answer format. Write a question on one side, write a detailed answer on the other side.

Practice writing it out in full complete sentences so that you know how all of the ideas should be expressed.

Next, highlight the key information that you need to remember.

Ask someone to test you - you must name the information that you have highlighted to know that the answer is correct.

You can also create digital flashcards using Quizlet and other online tools to test yourself.

Past Papers

For some subjects (especially Maths), past papers are a helpful way to test yourself across a number of modules. As you work through your textbook to review the module, use the past papers as a guide to how successful you have been to now answering the questions.

Use the Textbook thoroughly!

The beginning of chapters in textbooks typically capture the core of the learning for the module. In Maths, this is where all the concepts are explained and where the reasoning is unpacked. Don't skip these important introductions. Go back and review the notes you may have ignored early in the module. Work through the examples at the beginning of each sub-chapter.

Create Mind Maps

Mind maps are an excellent way to take five pages of notes and distill them down to one page – this makes the notes easier to memorise, and helps you understand how things on different pages of notes tie together. Here are the steps for creating a mind map from a page of notes:

Step 1 - Main idea in the middle

The main topic of your mind map goes in a circle in the middle of the page. For example, in Science this might be something like “cell division” if that is the major topic you are studying at the moment. When you are studying, this should be the very first thing you see when you pick up the page.

Step 2 - Sub-headings branch off the middle

Next, take the sub-headings from your page of notes and have them coming as branches off the centre circle.

Step 3 - Bullet points branch off branches

Once you've completed that, take the bullet points from your sub-headings and have them branch off the subheadings in your notes.

Step 4 - Link different branches together

Once you have distilled a few pages of notes into the mind map, have a look for ways you can link them together. For example, you can link different sub-headings together which share a common theme.

Example: turning notes into a mind-map

Stage 5 Commerce Half Yearly Examination

Assessment Task Number: 2

Weighting: 30%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria

- Consumer and Financial Decisions
- Investing

Outcomes

COM5 - 2	analyses the rights and responsibilities of individuals in a range of consumer, financial, economic, business, legal, political and employment contexts
COM5 - 3	examines the role of law in society
COM5 - 4	analyses key factors affecting decisions

BPL Dispositions

To complete this task successfully, you will be required to stretch your **reasoning** skills, **communicating** your knowledge of the course material as you complete your examination.

Examination Components

1. Section 1: Stimulus Response
2. Section 2: Short Answer Responses
3. Section 3: Extended Response

Stage 5 Commerce Examination Study Guide

Key Study Strategies:

- Revision of skills, notes, handouts and other resources covered in class.
- Look carefully at the dot points below and ensure you have revised each of them. If you are missing classwork for any of these dot points, please ensure you check Canvas, or ask a friend for a copy of a worksheet and catch up.
- Summarise the content below using study notes, flashcards, mind maps, etc – whichever strategy works best for you to remember the content covered.

In order to prepare for this examination students should focus their study on the following topics:

Consumer and Financial Decisions

- Scope of commerce
- Factors influencing consumer decisions
- How individuals make decisions
- Advantages and disadvantages of different payment options
- Consumer Protection
- Contracts, legal rights and responsibilities
- Financial Management
- Current Issues

Investing

- Reasons for Investing
- Investment options

It is suggested that students use/access the following resources:

- Canvas lessons, notes from class and worksheets provided to you in lessons

Year 9 Geography Half Yearly Examination

Assessment Task Number: 2

Weighting: 40%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria:

- Changing Places
- Human Wellbeing
- Geographical Skills

Outcomes

GE5-APC-01	analyses how Aboriginal Peoples' Custodianship of Country supports environmental management and enhances Community wellbeing
GE5-COM-01	selects and applies concepts and terminology to communicate geographical information for a range of purposes, audiences and contexts
GE5-PER-01	accounts for the perspectives of people and organisations on a range of geographical opportunities and challenges

BPL Dispositions

To complete this task successfully, you will be required to stretch your **linking** and **reasoning** skills by **distilling** your knowledge of the course material from Terms 1 and 2 as you complete your examination.

Examination Components

- The examination will cover the content and skills covered in Geographical Map Skills and Sustainable Biomes which you have studied during Terms 1 and 2.
- The examination will be 90 minutes in length and will consist of THREE sections:
 - Section 1: Multiple Choice
 - Section 2: Short Answers
 - Section 3: Extended Response

Please note Geographical skills will be integrated throughout the examination.

Please bring a black pen, lead pencil, eraser, ruler, protractor and calculator to the exam.

Year 9 Geography Examination Study Guide

Key Study Strategies:

- Revision of skills, notes, handouts and other resources covered in class.
- Look carefully at the dot points below and ensure you have revised each of them. If you are missing classwork for any of these dot points, please ensure you check Canvas, or ask a friend for a copy of a worksheet and catch up.
- Summarise the content below using study notes, flashcards, mind maps, etc – whichever strategy works best for you to remember the content covered.

In order to prepare for this examination students should focus their study on the following topics:

Geographic Skills

- Map Skills including direction, bearing, scale, distance
- Choropleth Maps
- Bar Graphs
- Interpreting data tables

Changing Places

- Movement of People
- Changing Settlement Patterns
- Urban Planning for Sustainability

Human Wellbeing

- Human Wellbeing and Development

It is suggested that students use/access the following resources:

- Additional handouts and resources you have been given by your class teacher.
- Notes you have taken and exercises you have completed in class on Canvas.

Year 10 Geography Half Yearly Examination

Assessment Task Number: 2

Weighting: 50%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria

- Human Wellbeing
- Environmental Change and Management
- Geographical Skills

Outcomes

GE5.1	explains the diverse features and characteristics of a range of places and environments
GE5.2	explains the processes and influences that form and transform places and environments
GE5.3	analyses the effect of interactions and connections between people, places and environments
GE5.4	accounts for perspectives of people and organisations on a range of geographical issues
GE5.5	assesses management strategies for places and environments for their sustainability

BPL Dispositions stretched in this exam

To complete this task successfully, you will be required to stretch your **linking** and **reasoning** skills by **distilling** your knowledge of the course material from Terms 1 and 2.

Examination Components

- The examination will cover the content and skills relating to the topics covered 'Human Wellbeing, Environmental Change and Management. It will also cover Geographical Skills.
- The examination will be 90 minutes in length and will consist of THREE sections:
 1. Multiple choice
 2. Short Answer
 3. Extended Response

Please note Geographical Skills will be integrated throughout the examination in all sections.

Please bring a pen, pencil, ruler, protractor and calculator to the exam

Year 10 Geography Examination Study Guide

Key Study Strategies:

- Revision of skills, notes, handouts and other resources covered in class.
- Look carefully at the dot points below and ensure you have revised each of them. If you are missing classwork for any of these dot points, please ensure you see your teacher and catch up.
- Summarise the content below using study notes, flash cards, mind maps, etc – whichever strategy works best for you to remember the content and skills covered.

In order to prepare for this examination students should focus their study on the following topics:

Human Wellbeing

- Human Wellbeing and Development
- Spatial Variations in Human Wellbeing
- Human Wellbeing in Australia
- Improving Human Wellbeing

Environmental Change and Management

- Environments
- Environmental Change

Geographic Skills

- Topographic Map
- Choropleth Maps
- Population Pyramids
- General Map Skills (BOLTSS)
- Data Tables
- Bar Graphs
- Spidergrams
- Scattergraphs

It is suggested that students use/access the following resources:

- Canvas lessons, Canvas PowerPoints
- Teacher Handouts and Worksheets

Year 10 History Half Yearly Examination

Assessment Task Number: 2

Weighting: 50%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria:

Australia during the Vietnam War era

Rights and Freedoms

Source Analysis

Extended Writing

Outcomes

HT5.2	sequencing and explaining the significant patterns of continuity and change in the development of the modern world and Australia
HT5.4	explains and analyses the causes and effects of events and developments in the modern world and Australia
HT5.6	identifying and evaluating the usefulness of sources in the historical inquiry process
HT5.9	applying a range of relevant historical terms and concepts when communicating an understanding of the past

BPL Dispositions stretched in this exam

To complete this task successfully, you will be required to stretch your **communicating** and **reasoning** skills as you **distil** what you have learnt this Semester about the Cold War context and Australia during the Vietnam War era.

Examination Components

This examination will cover content on Australians during the Vietnam War Era and Rights and Freedoms.

Section 1 – Multiple Choice

Section 2 – Short Answer

Section 3 – Extended Response

Year 10 History Examination Study Guide

Key Study Strategies:

- Be attentive during in-class revision.
- Seek help as early as possible. Do NOT leave it until the night before the exam.
- Revise the relevant Canvas Course lesson pages.
- Revision of source skills: notes, handouts and other resources covered in class.
- Look carefully at the points below and ensure you have revised each of them. If you are missing classwork for any of these points, please ensure you see your teacher and catch up.
- Summarise and learn the content below using study notes, flash cards, mind-maps, etc.

In order to prepare for this examination students should focus their study on the following topics:

Australia and The Vietnam War Era

- Cold War terminology
- Dates of key events leading to Australia's involvement in the Vietnam War
- Australia's response to communism and the importance of PM Robert Menzies
- Reasons for Australian involvement in the Vietnam War
- The nature and impact of warfare in Vietnam
- Significance of The Battle of Long Tan
- Attitudes towards the Vietnam War and the role of media

Rights & Freedoms

- Establishment of the Universal Declaration of Human Rights
- Establishment of the United Nations
- Australia's involvement in United Nations
- 1939 Day of Mourning Protest
- Early Fight for the Rights of Indigenous Australians

Source Analysis

- Use of TOMAC PRU or related source analysis scaffolds
- Understanding usefulness, reliability and perspective

It is suggested that students use/access the following resources:

- Canvas Course
- Class worksheets/activities done in class
- Summarise the topics above using study notes, flash cards, mind-maps, create recordings of notes, etc.
- Assessment Task feedback from the previous term
- Practise interpreting source materials

Stage 5 History Elective Half Yearly Examination

Assessment Task Number: 2

Weighting: 30%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria

- Vikings
- Heroes and Villains
- Source Analysis
- Essay Writing

Outcomes

HT5.3	sequences major historical events or heritage features, to show an understanding of continuity, change and causation
HT5.8	selects and analyses a range of historical sources to locate information relevant to an historical inquiry
HT5.9	applies a range of relevant historical terms and concepts when communicating an understanding of the past

BPL Dispositions

Examination Components

Section 1: Multiple Choice

Section 2: Short Answer

Section 3: Extended Response

Stage 5 History Elective Examination Study Guide

Key Study Strategies:

- VIEW, ANNOTATE, SUMMARISE notes, handouts and other readings covered in class.
- REVIEW the dot points covered in the syllabus.
- REVISE analytical source-based skills, particularly how to thoroughly integrate evidence in a response.
- ATTEMPT the practice questions provided.
- SUBMIT practice responses for feedback.
- REVIEW peer and teacher feedback provided on short and long responses.
- COMMIT historical details to memory.
- PRACTISE writing extended responses.
- INTEGRATE historical terms, dates, events and key figures throughout a response.

In order to prepare for this examination students should focus their study on the following topics:

- The Vikings
- Heroes and Villains

It is suggested that students use/access the following resources:

- Past Assessment Task Feedback
- Content on Canvas
- Readings and lesson notes
- Class Notes

Year 9 Mathematics Numeracy Half Yearly Examination

Assessment Task Number: 2

Weighting: 30%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria:

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification: 15%

Outcomes

MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA4-ALG-C-01	generalises number properties to operate with algebraic expressions including expansion and factorisation
MA4-EQU-C-01	solves linear equations of up to 2 steps and quadratic equations of the form $ax^2 = c$
MA5-ALG-C-01	simplifies algebraic fractions with numerical denominators and expands algebraic expressions
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA4-LIN-C-01	creates and displays number patterns and finds graphical solutions to problems involving linear relationships
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools
MA5-LIN-C-02	graphs and interprets linear relationships using the gradient/slope-intercept form
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions stretch in exam

Examination Components

This task will comprise both multiple choice and short answer questions, covering the below mentioned topics.

- Indices
- Expressions and Equations
- Linear Relationships

Year 9 Mathematics Numeracy Examination Study Guide

Key Study Strategies:

- Revise your notes, home learning, worksheets and worked examples done in class
- Revise exercise questions in the textbook
- Use resources such as Atomi, Khan Academy and Eddie Woo videos
- Attend Learning Lounge for additional support
- Seek help as early as possible, do NOT leave it until the night before the exam

In order to prepare for this examination students should focus their study on the following topics:

- (Textbook: Cambridge Gold 9 Stage 5)
- Atomi revision – In class past papers

It is suggested that students use/access the following resources:

- Cambridge Chapter Revision Exercises and Topic Tests
- Practice Papers given in class

Year 9 Mathematics Standard Half Yearly Examination

Assessment Task Number: 2

Weighting: 30%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria:

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification: 15%

Outcomes

MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-IND-P-01	applies the index laws to operate with algebraic expressions involving negative-integer indices
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA5-ALG-C-01	simplifies algebraic fractions with numerical denominators and expands algebraic expressions
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA5-ALG-P-01	simplifies algebraic fractions involving indices, and expands and factorises algebraic expressions
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval
MA5-LIN-C-02	graphs linear relationships, with and without digital tools, graphs and interprets linear relationships using the gradient/slope-intercept form
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions stretched in this exam

Examination Components

This task will comprise both multiple choice and short answer questions, covering the below mentioned topics.

- Indices
- Expressions, Algebraic Fractions and Equations
- Linear Relationships

Year 9 Mathematics Standard Examination Study Guide

Key Study Strategies:

- Revise your notes, home learning, worksheets and worked examples done in class
- Revise exercise questions in the textbook
- Use resources such as Atomi, Khan Academy and Eddie Woo videos
- Attend Learning Lounge for additional support
- Seek help as early as possible, do NOT leave it until the night before the exam

In order to prepare for this examination students should focus their study on the following topics:

- Indices
- Expressions and Equations
- Linear Relationships

It is suggested that students use/access the following resources:

- Cambridge Chapter Revision Exercises and Topic Tests
- Practice Papers given in class

Year 9 Mathematics Advanced Half Yearly Examination

Assessment Task Number: 2

Weighting: 30%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification 15%

Outcomes

MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-IND-P-01	applies the index laws to operate with algebraic expressions involving negative-integer indices
MA5-IND-P-02	describes and performs operations with surds and fractional indices
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA5-ALG-C-01	simplifies algebraic fractions with numerical denominators and expands algebraic expressions
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA5-EQU-P-01	solves monic quadratic equations, linear inequalities and cubic equations of the form $ax^3 = k$
MA5-EQU-P-02	solves linear equations of more than 3 steps, monic and non-monic quadratic equations, and linear simultaneous equations
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools
MA5-LIN-C-02	graphs and interprets linear relationships using the gradient/slope-intercept form
MA5-LIN-P-01	describes and applies transformations, the midpoint, gradient/slope and distance formulas, and equations of lines to solve problems
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions stretched in this exam

Examination Components

This examination will include content from:

- Indices and Surds
- Expressions, Equations and Inequalities
- Linear Relationships

Key Study Strategies:

- Revise your notes, home learning, worksheets and worked examples done in class
- Revise exercise questions in the textbook
- Use resources such as Atomi, Khan Academy or Eddie Woo videos
- Attend Learning Lounge for additional support
- Seek help as early as possible, do NOT leave it until the night before the exam

In order to prepare for this examination students should focus their study on the following topics:

- Indices and Surds
- Expressions, Equations and Inequalities
- Linear Relationships

It is suggested that students use/access the following resources:

- YNOT Math Playlists: <https://www.youtube.com/channel/UCSJJ8VZVxWobHWB4tmL0BiA/playlists>
- Cambridge Chapter Revision Exercises and Topic Tests
- Learning Lounge on Thursday after school
- Eddie Woo Playlists
- Practice Papers given in class

Year 9 Accelerated Mathematics Half Yearly Examination

Assessment Task Number: 2

Weighting: 30%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria:

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification 15%

Outcomes

MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-IND-P-01	applies the index laws to operate with algebraic expressions involving negative-integer indices
MA5-IND-P-02	describes and performs operations with surds and fractional indices
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA5-EQU-P-01	solves monic quadratic equations, linear inequalities and cubic equations of the form $ax^3 = k$
MA5-EQU-P-02	solves linear equations of more than 3 steps, monic and non-monic quadratic equations, and linear simultaneous equations
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools
MA5-LIN-C-02	graphs and interprets linear relationships using the gradient/slope-intercept form
MA5-LIN-P-01	describes and applies transformations, the midpoint, gradient/slope and distance formulas, and equations of lines to solve problems
MA5-NLI-C-01	identifies connections between algebraic and graphical representations of quadratic and exponential relationships in various contexts
MA5-NLI-C-02	identifies and compares features of parabolas and exponential curves in various contexts
MA5-NLI-P-01	interprets and compares non-linear relationships and their transformations, both algebraically and graphically
MA5-RAT-P-01	identifies and solves problems involving direct and inverse variation and their graphical representations
MA5-RAT-P-02	analyses and constructs graphs relating to rates of change
MA5-FNC-P-01	uses function notation to describe and graph functions of one variable and graphs inequalities in one and 2 variables
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions stretched in this exam

Examination Components

Students will be assessed on the following content:

- Indices and Surds
- Equations, Inequalities and Simultaneous Equations
- Quadratic Equations
- Non-Linear Relationships & Functions

Year 9 Accelerated Mathematics Examination Study Guide

Key Study Strategies:

- Review each topic thoroughly, including all worksheets/resources provided in class, and various textbook resources
- Seek assistance from your teacher when needed
- Engage with the past papers provided to you

In order to prepare for this examination students should focus their study on the following topics:

- (Textbook: Cambridge Maths 10 Advanced Stage 5)
- Algebra, equations and linear relationships
- Indices, exponentials and logarithms
- Measurement and surds
- Quadratic Expressions and Equations
- Parabolas, Rates of Change and Variation
- Functions and Other Graphs

It is suggested that students use/access the following resources:

- Cambridge Chapter Revision Exercises and Topic Tests
- Practice Papers given in class

Year 10 Mathematics Numeracy Half Yearly Examination

Assessment Task Number: 2

Weighting: 30%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification: 15%

Outcomes

MA5-ALG-C-01	simplifies algebraic fractions with numerical denominators and expands algebraic expressions
MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools
MA5-LIN-C-02	graphs and interprets linear relationships using the gradient/slope-intercept form
MA5-NLI-C-01	identifies connections between algebraic and graphical representations of quadratic and exponential relationships in various contexts
MA5-NLI-C-02	identifies and compares features of parabolas and exponential curves in various contexts
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions stretched in this exam

Examination Components

- Algebraic Expressions and Indices
- Equations, Formulas and Inequalities
- Linear Relationships
- Non-Linear Relationships

Year 10 Mathematics Numeracy Examination Study Guide

Key Study Strategies:

- Reviewing each topic thoroughly, including all worksheets/resources provided in class, and various textbook resources.
- Seeking assistance from your teacher when needed.
- Engage with the past papers provided to you.

In order to prepare for this examination students should focus their study on the following topics:

- Atomi revision – In class past papers

It is suggested that students use/access the following resources:

- Cambridge Chapter Revision Exercises and Topic Tests
- Practice Papers given in class

Year 10 Mathematics Standard Half Yearly Examination

Assessment Task Number: 2

Weighting: 30%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification: 15%

Outcomes

MA5-ALG-C-01	simplifies algebraic fractions with numerical denominators and expands algebraic expressions
MA5-ALG-P-01	simplifies algebraic fractions involving indices, and expands and factorises algebraic expressions
MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-IND-P-01	applies the index laws to operate with algebraic expressions involving negative-integer indices
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA5-EQU-P-01	solves monic quadratic equations, linear inequalities and cubic equations of the form $ax^3 = k$
MA5-EQU-P-02	solves linear equations of more than 3 steps, monic and non-monic quadratic equations, and linear simultaneous equations
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools
MA5-LIN-C-02	graphs and interprets linear relationships using the gradient/slope-intercept form
MA5-RAT-P-01	identifies and solves problems involving direct and inverse variation and their graphical representations
MA5-NLI-C-01	identifies connections between algebraic and graphical representations of quadratic and exponential relationships in various contexts
MA5-NLI-C-02	identifies and compares features of parabolas and exponential curves in various contexts
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions stretched in this exam

Examination Components

Students will be assessed on the following content:

- Algebraic Expressions and Indices
- Equations, Formulas and Inequalities
- Linear Relationships
- Non-Linear Relationships

Year 10 Mathematics Standard Examination Study Guide

Key Study Strategies:

- Reviewing each topic thoroughly, this includes all worksheets/resources provided in class, and various textbook resources
- Seeking assistance from your teacher when needed
- Engage with the past papers provided to you

In order to prepare for this examination students should focus their study on the following topics:

- Algebraic expression and indices
- Equations and formula
- Linear and non-linear Relationships

It is suggested that students use/access the following resources:

- Cambridge Chapter Revision Exercises and Topic Tests
- Practice Papers given in class

Year 10 Mathematics Advanced Half Yearly Examination

Assessment Task Number: 2

Weighting: 30%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria:

Understanding, Fluency and Communicating: 15%

Problem Solving, Reasoning and Justification 15%

Outcomes

MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-IND-P-01	applies the index laws to operate with algebraic expressions involving negative-integer indices
MA5-IND-P-02	describes and performs operations with surds and fractional indices
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA5-EQU-P-01	solves monic quadratic equations, linear inequalities and cubic equations of the form
MA5-EQU-P-02	solves linear equations of more than 3 steps, monic and non-monic quadratic equations, and linear simultaneous equations
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools
MA5-LIN-C-02	graphs and interprets linear relationships using the gradient/slope-intercept form
MA5-LIN-P-01	describes and applies transformations, the midpoint, gradient/slope and distance formulas, and equations of lines to solve problems
MA5-NLI-C-01	identifies connections between algebraic and graphical representations of quadratic and exponential relationships in various contexts
MA5-NLI-C-02	identifies and compares features of parabolas and exponential curves in various contexts
MA5-NLI-P-01	interprets and compares non-linear relationships and their transformations, both algebraically and graphically
MA5-RAT-P-01	identifies and solves problems involving direct and inverse variation and their graphical representations
MA5-RAT-P-02	analyses and constructs graphs relating to rates of change
MA5-FNC-P-01	uses function notation to describe and graph functions of one variable and graphs inequalities in one and 2 variables
MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly

BPL Dispositions stretched in this exam

Examination Components

Students will be assessed on the following content:

- Indices and Surds
- Equations, Inequalities and Simultaneous Equations
- Quadratic Equations
- Non-Linear Relationships & Functions

Year 10 Mathematics Advanced Examination Study Guide

Key Study Strategies:

- Review each topic thoroughly, including all worksheets/resources provided in class, and various textbook resources
- Seek assistance from your teacher when needed
- Engage with the past papers provided to you

In order to prepare for this examination students should focus their study on the following topics:

- (Textbook: Cambridge Maths 10 Advanced Stage 5)
- Algebra, equations and linear relationships
- Indices, exponentials and logarithms
- Measurement and surds
- Quadratic Expressions and Equations
- Parabolas, Rates of Change and Variation
- Functions and Other Graphs

It is suggested that students use/access the following resources:

- Cambridge Chapter Revision Exercises and Topic Tests
- Practice Papers given in class

Stage 5 Music Half Yearly Examination

Assessment Task Number: 2

Weighting: 15%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria Listening 15%

Outcomes

MU5-LIS-01	uses listening skills to analyse music in relation to stylistic, cultural, historical and social contexts
MU5-LIS-02	uses listening skills to evaluate how the elements of music are manipulated and combined

BPL Dispositions

Examination Components

Students will be assessed on your ability to:

- Interpret Scores and Dictations: Accurately read scores including recognising various musical symbols and notations.
- Analyse Musical Elements through listening excerpts focussing on: Duration, Pitch, Dynamics, Timbre, Texture, and Structure.
- Demonstrate Musical Understanding: Show a thorough understanding of musical Elements through detailed written analysis.

Stage 5 Music Examination Study Guide

Key Study Strategies:

- Be familiar with the terms/vocabulary relevant to the Elements, Duration, Pitch, Dynamics, Timbre, Texture, and Structure.
- Revise both class work and worksheets making sure you understand all work.
- Practice listening to music of your choice and identify the Formal structure of the song, Time signature, Tempo and Dynamics.

Year 9 Science Half Yearly Examination

Assessment Task Number: 2

Weighting: 25%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria

This examination is designed to allow you to show your understanding and comprehension of the materials covered by class work, home learning and practical work. The content being examined covers topics including **Energy** and **Diseases**, as well as **Science skills**.

Outcomes

SC5-EGY-01	evaluates current and alternative energy use based on ethical and sustainability considerations
SC5-DIS-01	explains how an understanding of the causes of disease can be used to prevent and manage the spread of disease
SC5-WS-05	selects and uses a range of tools to process and represent data
SC5-WS-06	analyses data from investigations to identify trends, patterns and relationships, and draws conclusions
SC5-WS-07	selects suitable problem-solving strategies and evaluates proposed solutions to identified problems
SC5-WS-08	communicates scientific arguments with evidence, using scientific language and terminology in a range of communication forms

- Law of conservation of energy
- Energy transfers
- Energy efficiency
- Renewable energy
- Non-renewable energy
- Electrical circuits
- Ohm's law
- Data analysis of energy use
- New energy sources
- How does the body maintain a stable internal environment?
- How do infectious and non-infectious diseases impact the normal working of the body?

BPL Dispositions

Examination Components

1. An examination of 90 minutes and 5 minutes reading time
2. This examination consists of 20 multiple-choice questions (20 marks) and short answer questions which could include such questions as defining, describing and explaining, as well as drawing diagrams and applying knowledge and science skills, etc.
3. All answers are to be written on the examination paper.

Year 9 Science Examination Study Guide

Key Study Strategies:

- Be familiar with the terms/vocabulary relevant to the topics covered.
- Review class notes, worksheets/handouts, and materials on Canvas.
- Read through learning tasks published in Canvas.
- Practice drawing scientific diagrams.

In order to prepare for this examination students should focus their study on the following topics:

Unit: Energy

- Law of conservation of energy
- Sources of energy
- Electrical energy
- Global future energy needs
- Energy in context

Unit: Diseases

- Homeostasis
- Infectious and non-infectious diseases

Unit: Science Skills

- Data analysis

It is suggested that students use/access the following resources:

- GOOD Science Stage 5
- Notes and worksheets/handouts
- Canvas lessons (weekly)
- Work as assigned by your class teacher

Year 10 Science Half Yearly Examination

Assessment Task Number: 2

Weighting: 25%

Exam Length: 90 minutes (plus 5 minutes reading time)

Course Specific Criteria

This examination is designed to allow you to show your understanding and comprehension of the materials covered by class work, home learning and practical work. The content being examined covers the first 5 weeks of the **Motion** topic.

Outcomes

10PW	applies models, theories and laws to explain situations involving energy, force and motion
11PW	explains how scientific understanding about energy conservation, transfers and transformations is applied in systems
8WS	applies scientific understanding and critical thinking skills to suggest possible solutions to identified problems
2VA	shows a willingness to engage in finding solutions to science-related personal, social and global issues, including shaping sustainable futures

BPL Dispositions

Examination Components

1. Multiple choice questions
2. Short answer questions

You will be assessed on your ability to:

1. Perform calculations involving speed, distance, acceleration and time
2. Construct and interpret graphs involving motion
3. Recall and apply Newton's laws of motion

Year 10 Science Examination Study Guide

Key Science Study Strategies:

- Revise class notes and worksheets, make summary notes
- Complete topic questions on “Motion and Newton’s Laws” on Stile
- Complete worksheet revision activities in your Stile workbooks in the topics “Kinematics” and “Newton’s Laws of Motion”
- Review work completed on Canvas in Term 2, from Week 1 through to Week 5
- Revise practical activities
- Practice reading and interpreting graphs and graphical information
- Revise all new terminology from the Kinematics and Dynamics topic and put the terms into sentences

In order to prepare for this examination students should focus their study on the following topics:

- Motion

It is suggested that students use/access the following resources:

- Stile
- CANVAS
- Work from in class
