Assessment at Norwest

The College has high expectations of all its students and strongly encourages every student to apply their best effort to all course work, including assessment tasks. At Norwest, assessments are designed and managed to enable students to both maximise their potential and learning and demonstrate the knowledge, understanding, and skills they have achieved.

Students are encouraged to take responsibility for their own learning, monitoring their own progress, and using a range of strategies to achieve their learning goals.

This Assessment Handbook provides students and parents with the details of the planned *assessment of learning* for each course throughout the academic year. You will find details of the outcomes for each course, the core components of each course and the planned assessments of learning throughout the year with their specific weightings.

To assist students and parents to monitor and plan, Stage Semester Assessment Calendars are published on the Secondary Students Tile located on the NWCC Student page of the website (www.norwest.nsw.edu.au) and by clicking on their student profile in Edumate.

The College's Assessment Policy is available to parents and students on the College website (www.norwest.nsw.edu.au) by clicking on the NWCC Parents Page and then the College Policies tile.

Each course at Norwest operates under NESA requirements and all aspects of planning, programming, assessing, and reporting are monitored by the Head of Faculty (HOF) for that Key Learning Area, Director of Studies (DOS) and by the Director of Teaching and Learning (DTL). Where appropriate, the Year Advisor (YA) and Head of Secondary Years (HSY) will be consulted. Parents and students should direct any enquiries about the structure of the following assessment schedules to these staff members.

NSW Educational Standards Authority (NESA) Advice on Assessment

NESA continues to promote a standard-referenced approach to assessing and reporting student achievement in NSW and the importance of assessment for, as, and of learning as essential components of good teaching and learning.

Assessment:

- provides opportunities for teachers to gather evidence about student achievement in relation to outcomes;
- enables students to demonstrate what they know and can do;
- clarifies student understanding of concepts and promotes deeper understanding;
- provides evidence that current understanding is a suitable basis for future learning.

Assessment for Learning (or formative assessment) usually occurs throughout the teaching and learning process to clarify student learning and understanding

Assessment as Learning occurs when students monitor their own learning, ask questions and use a range of strategies to decide what they know and can do, and how to use assessment for new learning

Assessment of Learning (or summative assessment) assists teachers to assess achievement against outcomes and standards. It usually occurs at defined key points during a unit of work or at the end of a unit of work, term or semester and may be used to rank or grade students.

A-E grades are issued on a Semester basis based primarily on assessment of learning tasks.

The Common Grade scale (used by all schools in NSW) describes student performance at each of five levels:

- A. The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.
- B. The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student is able to apply this knowledge and these skills to most situations.
- C. The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes and skills.
- D. The student has a basic knowledge and understanding of the content and has achieved a limited level of competence in the processes and skills.
- E. The student has an elementary knowledge and understanding in few areas of the content and has achieved very limited competence in some of the processes and skills.

This Assessment Handbook provides students and parents with the details of the planned *assessment of learning* for each course throughout the academic year. You will find details of the outcomes for each course, the core components of each course and the planned assessments of learning throughout the year with their specific weightings.

Satisfactory Achievement

A student is considered to have satisfactorily completed a course if, in the Principal's view, there is sufficient evidence that the student has:

- followed the course developed or endorsed by NESA;
- applied themselves with diligence and sustained effort to the set tasks and experiences provided in the course by the school;
- achieved some or all of the course outcomes.

Norwest Assessment Procedures

Each course at Norwest operates under NESA requirements and all aspects of planning, programming, assessing and reporting are monitored by the Head of Faculty, Director Studies (DOS) and by the Director of Teaching and Learning (DTL). Parents and students should direct any enquiries about the structure of the following assessment schedules to these staff members.

The College has high expectations of all its students and strongly encourages every student to apply their best effort to all course work, including assessment tasks.

Notification and Timing

Students are issued with a booklet and assessment calendar summarising the assessment requirements at the beginning of the academic year. Both the booklet and calendar are available on the College website. The College endeavours to avoid having more than one hand-in task and one in-class task per day. However, this cannot always be avoided, and it will not be grounds for appeal that any student has more than one of each on any day, or has several successive days of Assessments, provided that due notice has been given of each.

At least two weeks before the Task is due, written notification of the Task will be issued to students, with details of the outcomes to be assessed, the weighting of the Task, the marking criteria and any other special arrangements.

Assessments which are part of examination periods will be notified by exam timetables and teacher devised revision advice.

Where a teacher feels that, through exceptional circumstances (e.g prolonged unexpected absence of the teacher), the class is unprepared for an assessment task, a request to extend the due date must be made to the DTL. The Head of Secondary Years (HSY) and Head of Faculty may be consulted before changes are agreed upon to ensure equity for the whole cohort. Changes to dates will be clearly communicated to parents and students as soon as this change is approved.

Types of tasks

- In-class tasks – will require students to prepare for the task both at home and in the previous lessons and it will be completed in the course of a normal lesson. These may include – tests, writing tasks, practicals, performances, speeches or presentations (or a combination of these).
- Submitted tasks – will require students to complete a task by a due date and submit it to their teacher. Some work on these tasks may also be completed at school and drafts may be required to be submitted. These may include – research assignments, personal design/representation tasks.
- Collaborative tasks - will require group participation. When this is the case, each member of the group will be responsible for their contribution and assessed individually, for some components.
- In-class and submitted tasks – will require students to complete elements of both types of tasks.

Preparation

This Assessment Handbook and an assessment weekly calendar for each Semester will be placed in the “Parent Links” section of the College website and College App.

As we consider assessment to be for and as learning as well as of learning, teachers will endeavour to assist students to prepare adequately and meet deadlines by professional management of the assessment cycle, including timely notification, scaffolding tasks where appropriate, mandating drafts, and giving timely feedback.

Importance of feedback

- Feedback is essential for effective student learning;
- Students are encouraged to submit draft assessments for feedback prior to the completion of the final task. Teachers will provide feedback where drafts are submitted no later one week prior to the task due date. Teachers may accept drafts after this date at their own discretion;
- Teachers will endeavour to return drafts to students as promptly as possible, no less than 48 hours before the task is due;
- Teachers are not to rewrite students' work or to correct to perfection – but simply to give constructive, timely feedback;

- Students should seek feedback on their work after task completion or submission to assist them to monitor their progress towards the achievement of specified learning outcomes and to improve the quality of their work.
- Students should reflect on how they will use the feedback to inform their next steps which will deepen their knowledge and skills

Submission

The rules around assessments will increase in rigour as the student progresses through the Secondary Years. Mentors will assist students to manage their workload – reviewing the term's assessment calendar and helping students to plan their time.

Students will often be required to submit their work via Canvas by the published due time. **Any task submitted after this time will be considered late, regardless if it is submitted on the same day; late penalties will apply, as per College policy.** Any hard copy submissions should include an Assessment Task Cover Sheet where students will be issued a receipt for their submission to confirm the date and time.

Where a task is to be completed as an in-class task, students' attendance will be checked. The expectation – no matter what the type of task – is that all students in the course will be ready on the due date.

Electronic Provisions

Where a teacher has requested electronic submission, the College's electronic submission procedures must be followed. This will typically be via Canvas and required by the time set, no later than 6pm Monday-Friday.

Computer use

In all cases of tasks completed at home on the computer, responsible use of technology is expected. This includes augmented digital manipulation of text/graphics/code or by artificial intelligence (A.I.). Students are required to keep back-up copies of their tasks to be produced on request. Students must be able to **produce draft copies** of tasks to confirm their iterative process. Any task that "appears" as generated immediately will be deemed not all the student's own work.

Please note: Loss of Task (either electronic or otherwise) or inability to print will not be accepted as a valid reason for late submission. All drafts should be saved and stored externally.

Malpractice

Malpractice is dishonest behaviour by a student that gives them an unfair advantage over others or leads to an unfair appraisal of their achievement. Malpractice during assessments or examinations is:

- Breaching test/examination rules.
- Acquiring unauthorised copies of the test before the test time/date.
- Copying the work of others.
- Submitting work that is created by A.I, regardless that any edits may have been made by the students personally. This includes work that began as the students own original work and has been enhanced by A.I. without appropriate acknowledgement and scholarship.
- Taking unauthorised material into the test and/or using it during the test.
- Assisting another student to engage in malpractice is also a form of malpractice.
- Plagiarism is another form of malpractice

Plagiarism

Plagiarism can be identified as:

- Copying, buying, downloading, stealing or borrowing someone else's work in part or in whole, and presenting it as their own.
- Using material directly from books, journals, CDs or the internet without acknowledging the source.
- Paying someone with money or in kind to write or prepare material that is associated with a task, such as process diaries, logs and journal.
- Submitting work that contains a large contribution from another person, such as a parent, coach or subject expert that is not acknowledged.
- Submitting work that is created by A.I, regardless that any edits may have been made by the students personally. This includes work that began as the student's own original work and has been enhanced by A.I. without appropriate acknowledgement and scholarship.
- Using words, ideas, designs or the workmanship of others in practical and performance tasks without appropriate acknowledgement.

Consequences of Malpractice

In all cases of suspected malpractice confidentiality will be maintained and the principles of procedural fairness will be observed at all times: If a student is found have committed malpractice of any type they may receive a zero for their assessment tasks and be awarded an afterschool service. This decision will be made by the supervising teacher in consultation with the Assessment Review Panel (ARP), which consists of Director of Teaching and Learning, Director of Studies, Head of Secondary Years and relevant Head of Faculty.

Extensions or Permitted Late Submission of a Task

The late submission or completion of assessment tasks is a serious issue, as without legitimate cause it impacts the fair and equitable administration of the task.

- If a student knows beforehand that they will be absent, the College should be contacted by the parent and the subject teacher, relevant HOF and Year Advisor (YA) informed. **It is best to arrange for the student to sit or submit the task early;**
- Extension requests for the submission of assessment tasks must be made to the subject teacher using the Extension Request Form as soon as practicable (generally more than 48 hours) and will only be granted, in consultation with the Assessment Review Panel (ARP), in exceptional circumstances. These requests must be made prior to the due date of the administration of the task;
- Parents should submit the Extension Request Form to the subject teacher. Teachers note receipt of the form and, if an extension is granted by the ARP, the new time on Edumate and forward to Year Advisor and Head of Faculty for approval and storage;
- If a student becomes ill during an in-class assessment task the DOS will decide whether an estimate or a substitute task will be given.

Late or Non-Submission of a Task due to Illness or Misadventure

In the event a hand-in task is not submitted by the due date or an in-class task is not completed on or before the due date by reason of illness or misadventure **(including approved extended leave)** the following procedures should be followed, in consultation with the DOS as required:

- Illness/Misadventure form must be completed by parents and submitted to the subject teacher. **A separate form must be completed for each task/examination missed.** This includes tasks missed whilst away on approved extended leave.
- Misadventure (events outside the control of students) will be approved at the discretion of the DOS;
- The subject teacher will record the incident in Edumate noting the submission of the form and the revised due date if applicable;
- The subject teacher will administer the follow up task and attempt to ensure that the student receives no advantage. Where the subject teacher perceives that the student has received an advantage they must consult the DOS.

Follow up of Missed Tasks

If a student has missed a task, for whatever reason, they are responsible, in partnership with their subject teacher, to ensure that they take the task at the first opportunity (usually on the day of their return).

- Late hand-in tasks should be submitted directly to the subject teacher, with the Assessment Task Cover Sheet which will be receipted, or online via Canvas which will be date and time stamped.
- In-class, group or practical tasks will be managed by the subject teacher – but full cooperation is expected from the student;
- In examination periods, missed exams will be managed by the HOF with support from Learning Enrichment staff and the DOS. Students will be required to complete the paper the next day they return to school. This may result in two exams to be completed on the same day.
- If a student is absent due to illness or family circumstances (e.g. extended leave) and misses the entire exam block, the paper will become a take home task to be completed and marked for feedback. Exams are not permitted to be completed early as this compromises the integrity of the paper. The result will be recorded as N/A on Edumate. The Final Course Grade will be determined by the other assessment tasks throughout the course.

Non-Submission without Illness/Misadventure or Revised Date Missed

In the event a hand-in task is not submitted by the due date or an in-class task is not completed on or before the due date but illness or misadventure is not proven, or in the event of a revised date being missed the following procedures will be followed:

- The teacher will inform the student and parent (email/phone) that their assessment task is late and will incur a penalty. (If a revised date has been missed the HOF and DOS must also be informed);
- The teacher will record a note of the incident in Edumate, assign a revised date or task and inform the HOF;
- The teacher will mark the assessment task upon submission/completion;
- The student will be notified of their original mark and revised mark (see table below);

Number of days late (includes weekends)	Percentage of original mark credited to the student
1	75
2	50
3	25
4	0

- Apart from exceptional circumstances, students will be required to submit/complete all assessment tasks even if they will receive a revised mark of zero, to demonstrate achievement of the outcomes;
- The revised mark will contribute to student rank within their cohort and the original mark will be used to determine their overall A-E grade (achievement in the course).

Total Non-Submission/Non-Completion of Task

In the event a task is not submitted or completed at all after the process outlined above (including Extensions and Illness/Misadventure provisions):

- Such students are at risk of a 'N' Determination (see below). The teacher will ensure the HOF, YA and DOS are fully aware of the non-completion by the end of the same day
- The HOF or representative will contact the parent and discuss the incident with parent/guardian and, with the DOS, interview the student, advising them of the problem to be corrected and alert them to the possible consequences of an 'N' determination;
- The HOF will issue the parent/guardian with an 'N' Determination Warning letter (warnings are to be issued as soon as possible and as regularly as required);
- The HOF will request from the parent/guardian and student written acknowledgement of the warning;
- If the first letter did not achieve its objective, the DOS will issue a further warning letter; and retain copies of all relevant documentation on file.
- A mark of zero will apply for that task

Assessment Appeals

If students believe they have grounds to dispute the appropriateness of a mark for a recently returned Assessment Task, they must consult the Class Teacher immediately. The Class Teacher will defer to the Assessment Review Panel (which consists of DTL, DoS, HSY and HOF) who will review the task and act appropriately on any findings.

Internal Review Procedures

Students may appeal assessment decisions by submitting an Assessment Appeal Form (available on the College website). The Assessment Review Panel will consider all appeals, taking consideration of whether these guidelines were followed in all matters related to the assessment and whether the student was disadvantaged or treated unfairly. The appeal process will observe the principles of natural justice, incorporating the right to:

- be treated without bias,
- be informed of allegations being made against you,
- respond to an allegation, and
- information regarding the status of the complaint.

Care will be taken to ensure that the principles of natural justice are followed. They will refer to the online ACE manual for further procedures regarding the appeals process for Stages 5 and 6.

Grounds for appeal may be based on the following circumstances:

- Insufficient notification for a task has been provided (less than two weeks)
- The weightings used by the College in its Assessment Program do not conform to NESA requirements;
- The College has varied from its stated assessment program;
- Errors in calculations have been made;
- The student requests a review of the marks allocated based on the published marking rubric

Commerce – Stage 5

Assessment Approach and Requirements

Assessment is used to determine the students' initial knowledge, understanding and skills, to monitor student progress and to collect information to report student achievement. The assessment cycle is continuous; students receive and give themselves feedback on what they have learnt, and what needs to be done to continue their learning.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3
Date		Term 2 Week 1	Term 2 Week 6	Term 3 Week 6
Type of Task (In-Class/Submission)		In Class test: Consumer and Financial Decisions	Half Yearly Exam: Topics 1-2	Submission: Research Report Economic and Business Environment
Outcomes Assessed		COM5-1, COM5-4, COM5-6, COM5-8	COM5-1, COM5-2, COM5-8, COM5-9	COM5-1, COM5-3, COM5-4, COM5-6, COM5-7, COM5-8
Knowledge & Understanding	60%	20%	20%	20%
Skills – Communication and Research	40%	10%	10%	20%
Total	100%	30%	30%	40%

Course Outcomes

COM5-1	applies consumer, financial, economic, business, legal, political and employment concepts and terminology in a variety of contexts
COM5-2	analyses the rights and responsibilities of individuals in a range of consumer, financial, economic, business, legal, political and employment contexts
COM5-3	examines the role of law in society
COM5-4	analyses key factors affecting decisions
COM5-5	evaluates options for solving problems and issues
COM5-6	develops and implements plans designed to achieve goals
COM5-7	researches and assesses information using a variety of sources
COM5-8	explains information using a variety of forms
COM5-9	works independently and collaboratively to meet individual and collective goals within specified timeframes

Computing Technology – Stage 5

Assessment Approach and Requirements

Assessments are oriented around different modes of presentation including projects, reflection and reports. Course components are assessed according to syllabus requirements and the common grade scale.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3
Date		Term 2 Week 3	Term 3 Week 3	Term 4 Week 2
Type of Task (In-Class/Submission)		Submission: Database Project	Submission: Network Project	Submission: Automation Project
Outcomes Assessed		CT5-DPM-01, CT5-EVL-01, CT-DAT-01, CT5-COM-01, CT-THI-01, CT5-DAT-02	CT5-SAF-01, CT5-DAT-01, CT-DAT-02, CT5-DPM-01, CT5-COL-01, CT5-EVL-01	CT5-THI-01, CT5-DPM-01, CT5-COL-01, CT5-EVL-01, CT5-OPL-01
Enterprise Systems- Analysing Data	40%	40%		
Enterprise Information Systems: Modelling Networks and Social Connections	40%		40%	
Software Development: Building Mechatronic and Automated Systems	20%			20%
Total	100%	40%	40%	20%

Course Outcomes

CT5-COL-01	selects and justifies the application of appropriate software programs to a range of tasks
CT5-COM-01	selects, maintains, and appropriately uses hardware for a range of tasks
CT5-DAT-01	described and applies problem-solving processes when creating solutions
CT5-DAT-02	designs, produces, and evaluates appropriate solutions to a range of challenging problems
CT5-DES-01	critically analyses decision-making processes in a range of information and software solutions
CT5-DPM-01	justifies responsible practices and ethical use of information and software technology
CT5-EVL-01	acquires and manipulates data and information in an ethical manner
CT5-OPL-01	analyses the effect of past, current, and emerging information and software technologies on the individual and society
CT5-SAF-01	applies collaborative work practices to complete tasks
CT5-THI-01	communicates ideas, processes, and solutions to a targeted audience
CT5-COL-01	describes and compares key roles and responsibilities of people in the field of information and software technology

Design Innovation Technology – Stage 5

Assessment Approach and Requirements

Students will be assessed through a combination of class work and examinations. The major emphasis of the Design and Technology syllabus is on students actively designing, planning, constructing and evaluating quality practical projects. Students will learn to select and use a range of materials for individual projects. They will learn to competently and safely use a range of hand tools, power tools and machines to assist in the construction of projects. They will also learn to produce drawings and written reports to develop and communicate ideas and information relating to projects.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3
Date		Term 2 Week 8	Term 3 Week 7	Term 4 Week 4/5
Type of Task (In-Class/Submission)		Project and Folio	Project and Folio	Yearly exam
Module		The Design Process	Project Proposal and Management	All Modules
Outcomes Assessed		DIT5-SAF-01, DIT5-DEP-01, DIT5-MAT-01, DIT5-USE-01, DIT5-USR-01, DIT5-COM-01, DIT5-EVL-01	DIT5-USR-01, DIT5-MAT-01, DIT5-COM-01, DIT5-DEP-01, DIT5-WOR-01, SAF-01	DIT5-WOR-01, DIT5-IVT-01, DIT5-EVL-01, DIT5, DIT5- USE-01, DIT5-COM-01
Knowledge and understanding of course content	40%	10%	5%	25%
Knowledge and skills in designing, managing, producing and evaluating design projects	60%	25%	35%	
Total	100%	35%	40%	25%

Course Outcomes

DIT5-WOR-01	evaluates the responsibilities of designers and factors affecting their work
DIT5-USR-01	assesses the needs of end users to support innovative design solutions
DIT5-COM-01	communicates ideas, concepts, processes and solutions for design and production
DIT5-SAF-01	applies risk management and safe work practices through design and production
DIT5-DEP-01	applies technical and practical skills for design and production
DIT5-MAT-01	selects and justifies the use of materials based on their properties and suitability for purpose
DIT5-USE-01	selects and justifies the use of materials, tools, equipment and processes to make products
DIT5-EVL-01	develops and evaluates innovative design solutions using quality principles and design processes
DIT5-IVT-01	explains the influence of current and emerging technologies on the practice of designers

Drama – Stage 5

Assessment Approach and Requirements

Assessment tasks will explore a range of making, performing and critically studying.

Making allows students to contribute, select, develop, structure, create, interpret, enact, refine and manipulate (both individually and in a group) in the process of making drama. Making fosters an understanding of how drama/theatre works in both imagined and created situations.

Performing allows students to demonstrate acting and performance skills using dramatic forms, performance styles, dramatic devices, technologies and theatrical conventions to explore, structure and refine ideas. It is a collaborative process where meaning is created through the performers' relationship with the audience.

Critically studying allows students to demonstrate their understanding, experience, investigation, development, and evaluation through a variety of methods both individually and in a group.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3	Task 4
Date		Term 1 Week 7	Term 2 Week 8	Term 3 Week 8	Term 4 Week 4
Type of Task (In-Class/Submission)		In-Class: Montage Playbuilding Performance & Logbook Task	In-Class: Commedia Dell Arte Performance & Evocative writing Task	In-Class: Political Theatre Performance & Essay Task	In-Class: Submission: Monologues Performance
Outcomes Assessed		DR5-MAK-01, DR5-PER-02, DR5-APP-01	DR5-MAK-02, DR5-PER-01, DR5-APP-02	DR5-MAK-02, DR5-PER-02, DR5-APP-01	DR5-MAK-01, DR5-PER-01, DR5-APP-02
Making	30%	10%	10%	10%	Non-weighted
Performing	30%	10%	10%	10%	
Appreciating	40%	15%	15%	10%	
Total	100%	35%	35%	30%	

Course Outcomes

DR5-MAK-01	creates and refines meaning through experimentation with dramatic processes
DR5-MAK-02	selects and applies dramatic elements to create and refine works and experiences through dramatic contexts
DR5-PER-01	applies and adapts performance skills and dramatic processes to communicate intention and meaning
DR5-PER-02	manipulates dramatic elements to stage works and influence audience response through dramatic contexts
DR5-APP-01	analyses how creative choices shape intention and meaning through dramatic processes
DR5-APP-02	evaluates how dramatic elements are manipulated to influence audience response through dramatic contexts

Assessment Approach and Requirements

In English, Students will undertake assessment as, for and of learning in both responding to and composing texts. They will be expected to demonstrate knowledge, understanding and skill across a wide range of texts and modes of communication.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3	Task 4	Task 5
Date		Term 1 Week 9	Term 2 Week 9	Term 3 Week 6	Term 4 Weeks 4/5	Term 4 Week 8
Type of Task		Submission: Discursive Writing	In Class: Critical Essay	In Class+ Submission: Multimodal Task	Final Examination	In Class+ Submission: TED Talk Non- Weighted
Unit		Australian Identity	Close Study of a Classic Text	Shakespeare's Romeo & Juliet	Dystopian Fiction: Genre Study	Voice of Youth: Ted Talks 'Inspiration'
Outcomes Assessed		EN5-URB-01, EN5-ECA-01, EN5-ECB-01	EN5-RVL-01, EN5-URB-01 EN5-ECA-01	EN5-RVL-01, EN5-URA-01, EN5-ECB-01	EN5-RVL-01, EN5-URB-01, EN5-URC-01	EN5-URB-01, EN5-URC-01, EN5-ECA-01
Knowledge and understanding of course content	50%	10%	15%	15%	10%	Non-Weighted
Skills in responding to texts and communication of ideas and context across all modes	50%	15%	10%	10%	15%	
Total	100%	25%	25%	25%	25%	

Course Outcomes

EN5-RVL-01	Reading, viewing & listening	Uses a range of personal, creative, and critical strategies to interpret complex texts.
EN5-URA-01	Understanding & responding to texts A	Analyses how meaning is created through the use and interpretation of increasingly complex language forms, features, and structures.
EN5-URB-01	Understanding & responding to texts B	Evaluates how texts represent ideas and experiences, and how they can affirm or challenge values and attitudes.
EN5-URC-01	Understanding & responding to texts C	Investigates and explains ways of valuing texts and the relationships between them.
EN5-ECA-01	Expressing ideas & composing texts A	Crafts personal, creative, and critical texts for a range of audiences by experimenting with and controlling language forms and features to shape meaning.
EN5-ECB-01	Expressing ideas & composing texts B	Uses processes of planning, monitoring, revising, and reflecting to purposefully develop and refine composition of texts.

Engineering Technology – Stage 5

Assessment Approach and Requirements

Students will be assessed through a combination of class work and examinations. The major emphasis of the Engineering Technology syllabus is on students actively designing, planning, constructing and evaluating quality practical projects. Students will learn to select and use a range of engineering principles and materials for individual projects. They will learn to competently and safely use a range of hand tools, power tools and machines to assist in the construction of projects. They will also learn to produce drawings and written reports to develop and communicate ideas and information relating to projects. **Assessment tasks are based on a 60% practical and 40% theory component. Practical includes all folio work.**

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3
Date		Term 2 Week 7	Term 4 Week 2	Term 4 Week 4/5
Type of Task (In-Class/Submission)		Bridge and Tower report plus drawings	Rube Golberg Machine levers report	Yearly Exam
Module		Structures 1	Structures 2	ALL
Outcomes Assessed		IND5-2, IND5-3, IND5-4 IND5-5, IND5-7, IND5-8	IND5-2, IND5-3, IND5-5 IND5-6, IND5-7, IND5-8 IND5-9, IND 5-10	IND5-1, IND5-2, IND5-3 IND5-4, IND5-5, IND5-6 IND5-7, IND5-8, IND5-9
Theory	40%	10%	10%	20%
Practical	60%	25%	35%	
Total	100%	35%	45%	20%

Note: there will be feedback mark accountability in the practical projects.

Course Outcomes

IND5-1	identifies, assesses, applies and manages the risks and WHS issues associated with the use of a range of tools, equipment, materials, processes and technologies
IND5-2	applies design principles in the modification, development and production of projects
IND5-3	identifies, selects and uses a range of hand and machine tools, equipment and processes to produce quality practical projects
IND5-4	selects, justifies and uses a range of relevant and associated materials for specific applications
IND5-5	selects, interprets and applies a range of suitable communication techniques in the development, planning, production and presentation of ideas and projects
IND5-6	identifies and participates in collaborative work practices in the learning environment
IND5-7	applies and transfers skills, processes and materials to a variety of contexts and projects
IND5-8	evaluates products in terms of functional, economic, aesthetic and environmental qualities and quality of construction
IND5-9	describes, analyses and uses a range of current, new and emerging technologies and their various applications
IND5-10	describes, analyses and evaluates the impact of technology on society, the environment and cultural issues locally and globally

Food Technology – Stage 5

Assessment Approach and Requirements

Students will be assessed through a combination of practical food-based tasks completed In-Class, written reports, design projects and an Examination. The major emphasis of the Food Technology syllabus allows students to learn about the Focus areas through practical experiences. The Focus areas are addressed are Food in Australia, Food Selection and Health, Food for Special Occasions and Food Trends. Practical food preparation skills are integrated throughout the course. Practical projects afford students the opportunity to develop skills in planning, preparing, presenting, and evaluating recipes. Students learn to select and safely use a range of food technology tools and ingredients.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3	Task 4
Date		Term 1 Week 7	Term 2 Week 7	Term 3 Week 7	Term 4 Week 4/5
Type of Task (In-Class/Submission)		In class quiz (Food in Australia)	Research analysis & practical task (Food Selection & Health)	In-Class: Practical Assessment (Food for Special Occasions)	Final Examination
Outcomes Assessed		FT 5-6, FT 5-7, FT 5-8, FT 5-9, FT 5-12, FT 5-13	FT 5-1, FT 5-2, FT 5-5, FT 5-7, FT 5-8, FT 5-9, FT 5-10, FT 5-11	FT 5-1, FT 5-2, FT 5-5, FT 5-9, FT 5-10, FT 5-11, FT 5-13	FT 5-1, FT 5-2, FT 5-3, FT 5-4, FT 5-5, FT 5-6, FT 5-7, FT 5-9, FT 5-10, FT 5-11, FT 5-12, FT 5-13
Knowledge	45%	15%	5%		25%
Practical	55%		25%	30%	
Total	100%	15%	30%	30%	25%

Course Outcomes

FT 5-1	demonstrates hygienic handling of food to ensure a safe and appealing product
FT 5-2	identifies, assesses and manages the risks of injury and WHS issues associated with the handling of food
FT 5-3	describes the physical and chemical properties of a variety of foods
FT 5-4	accounts for changes to the properties of food which occur during food processing, preparation and storage
FT 5-5	applies appropriate methods of food processing, preparation and storage
FT 5-6	describes the relationship between food consumption, the nutritional value of foods and the health of individuals and communities
FT 5-7	justifies food choices by analysing the factors that influence eating habits
FT 5-8	collects, evaluates and applies information from a variety of sources
FT 5-9	communicates ideas and information using a range of media and appropriate terminology
FT 5-10	selects and employs appropriate techniques and equipment for a variety of food-specific purposes
FT 5-11	plans, prepares, presents and evaluates food solutions for specific purposes
FT 5-12	examines the relationship between food, technology and society
FT 5-13	evaluates the impact of activities related to food on the individual, society and the environment

Geography

Assessment Approach and Requirements

Year 9 Geography students will attempt three (3) Geography assessments over the course of Semesters 1 and 2. Students thus engage in formative and summative assessment and use a range of methods to demonstrate their learning.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3
Date		Term 1 Week 5	Term 2 Week 6	Term 3 Week 7
Type of Task (In-Class/Submission)		Submission: Fieldwork Report	Half Yearly Examination	Submission: Research and Report
Outcomes Assessed		GE5-DFC-02, GE5-PRI-02, GE5-PER-02	GE5-APC-02, GECOM-21, GE5-PER-02	GE5-PRI-02, GE5-MAN-02, GE5-TAP-02
Changing Places	25%	25%		
Human Wellbeing	25%		25%	
Biomes and Sustainable Agriculture	25%			25%
Environmental Change and Management	25%	5%	15%	5%
Total	100%	30%	40%	30%

Course Outcomes

GE5-DFC-02	explains how the diverse features and characteristics of a range of places and environments change over time
GE5-PRI-02	analyses the processes and interactions that transform people, places and environments
GE5-PER-02	accounts for the perspectives of people and organisations on a range of geographical opportunities and challenges
GE5-MAN-02	assesses different approaches to the management and protections of places and environments
GE5-APC-02	analyses how Aboriginal Peoples' Custodianship of Country supports environmental management and enhances Community wellbeing
GE5-TAP-02	applies and evaluates a range of geographical tools to acquire and process geographical information
GE5-COM-02	selects and applies concepts and terminology to communicate geographical information for a range of purposes, audiences and contexts

Geography Elective – Stage 5

Assessment Approach and Requirements

Students will develop and demonstrate knowledge and understanding of the course content through inquiry based investigations as well as class case studies. They will develop source-based skills and communicate their geographical understanding using appropriate terms, concepts and written forms. Students will develop their organisation and planning skills, knowledge and understanding, using data, research skills and problem-solving skills.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3
Date		Term 2 Week 1	Term 3 Week 5	Term 4 Week 4/5
Type of Task (In-Class/Submission)		Submission - Oceanography Research Assignment	Submission: Fieldwork and Research assignment	Final Examination
Outcomes Assessed		GEE5-2, GEE5-4, GEE5-5, GEE5-8, GEE5-9	GEE5-4, GEE5-6, GEE5-7, GEE5-8, GEE5-9	GEE5-1, GEE5-2, GEE5-3, GEE5-4, GEE5-9
Topic 1: Australia's Neighbours	25%	20%	5%	
Topic 2: Global Citizenship	25%		25%	
Topic 3: School based option – Transport	25%	10%		15%
Topic 4: Oceanography	25%			25%
Total	100%	30%	30%	40%

Course Outcomes

GEE5-1	explains the diverse features and characteristics of a range of places, environments and activities
GEE5-2	explains geographical processes and influences that form and transform places and environments
GEE5-3	analyses patterns associated with natural phenomena and human activity at a range of scales
GEE5-4	assesses the interactions and connections between people, places and environments that impact on sustainability
GEE5-5	accounts for contemporary geographical issues and events that impact on places and environments
GEE5-6	explains how perspectives of people and organisations influence a range of geographical issues
GEE5-7	analyses management strategies and the roles and responsibilities of individuals, groups and governments in response to geographical issues
GEE5-8	acquires and processes geographical information by selecting and using appropriate and relevant geographical tools for inquiry
GEE5-9	communicates geographical information to a range of audiences using a variety of strategies and geographical tools

History Elective – Stage 5

Assessment Approach and Requirements

Formal assessments will include an individual research task, a presentation, Project Based Learning task and a formal examination. Tasks are designed to facilitate deep investigation and improve the necessary skills for historical inquiry. The examination will provide students with an opportunity to demonstrate their understanding and give them the necessary skills and techniques required of them in Stage 6.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3
Date		Term 2 Week 2	Term 2 Week 6	Term 3 Week 5
Type of Task (In-Class/Submission)		In class: Historical Investigation	Half Yearly Examination	PBL Task: Investigation and Presentation
Outcomes Assessed		HT5.1, HT5.4, HT5.5	HT5.3, HT5.8, HT5.9	HT5.2, HT5.7, HT5.8
Ancient, Medieval and Modern Societies	25%	25%		
Thematic Study 1	25%		25%	
Thematic Study 2	25%			25%
History, Heritage and Archaeology	25%	5%	5%	15%
Total	100%	30%	30%	40%

Course Outcomes

HT5.1	applies an understanding of history, heritage, archaeology and the methods of historical inquiry
HT5.2	examines the ways in which historical meanings can be constructed through a range of media
HT5.3	sequences major historical events or heritage features, to show an understanding of continuity, change and causation
HT5.4	explains the importance of key features of past societies or periods, including groups and personalities
HT5.5	evaluates the contribution of cultural groups, sites and/or family to our shared heritage
HT5.6	identifies and evaluates the usefulness of historical sources in an historical inquiry process
HT5.7	explains different contexts, perspectives and interpretations of the past
HT5.8	selects and analyses a range of historical sources to locate information relevant to an historical inquiry
HT5.9	applies a range of relevant historical terms and concepts when communicating an understanding of the past
HT5.10	selects and uses appropriate forms to communicate effectively about the past for different audiences

Mathematics – Year 9 Accelerated

Assessment Approach and Requirements

There will be FOUR different forms of assessment:

- Term 1 In-Class Test
- Term 2 Half Yearly Examination
- Term 3 Question Bank (students given a bank of exam-style questions to study from and prepare for a test)
- Term 4 Final Examination

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3	Task 4
Date		Term 1 Week 5	Term 2 Week 6	Term 3 Week 8	Term 4 Week 4/5
Type of Task (In-Class/Submission)		In-Class Test	Half Yearly Examination	Question Bank	Final Examination
Outcomes Assessed		MA5-IND-C-01 MA5-IND-P-01,02 MA5-MAG-C-01 MA5-EQU-C-01 MA5-EQU-P-01,02 MA5-LIN-C-01,02 MA5-LIN-P-01	All Term 1 Outcomes + MA5-NLI-C-01,02 MA5-NLI-P-01 MA5-RAT-P-01,02 MA5-FNC-P-01	MA5-TRG-C-01,02 MA5-TRG-P-01,02 MA5-PRO-C-01 MA5-PRO-P-01 MA5-DAT-C-02	All Term 1, 2 and 3 Outcomes + MA5-LOG-P-01 MA5-POL-P-01
Working Mathematically		MAO-WM-01	MAO-WM-01	MAO-WM-01	MAO-WM-01
Understanding, Fluency and Communicating	50%	7.5%	15%	7.5%	20%
Problem Solving, Reasoning and Justification	50%	7.5%	15%	7.5%	20%
Total	100%	15%	30%	15%	40%

Course Outcomes

MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly
MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-IND-P-01	applies the index laws to operate with algebraic expressions involving negative-integer indices
MA5-IND-P-02	describes and performs operations with surds and fractional indices
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA5-EQU-P-01	solves monic quadratic equations, linear inequalities and cubic equations of the form $[ax]^3=k$
MA5-EQU-P-02	solves linear equations of more than 3 steps, monic and non-monic quadratic equations, and linear simultaneous equations
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools
MA5-LIN-C-02	graphs and interprets linear relationships using the gradient/slope-intercept form
MA5-LIN-P-01	describes and applies transformations, the midpoint, gradient/slope and distance formulas, and equations of lines to solve problems
MA5-NLI-C-01	identifies connections between algebraic and graphical representations of quadratic and exponential relationships in various contexts
MA5-NLI-C-02	identifies and compares features of parabolas and exponential curves in various contexts

MA5-NLI-P-01	interprets and compares non-linear relationships and their transformations, both algebraically and graphically
MA5-RAT-P-01	identifies and solves problems involving direct and inverse variation and their graphical representations
MA5-RAT-P-02	analyses and constructs graphs relating to rates of change
MA5-FNC-P-01	uses function notation to describe and graph functions of one variable and graphs inequalities in one and 2 variables
MA5-TRG-C-01	applies trigonometric ratios to solve right-angled triangle problems
MA5-TRG-C-02	applies trigonometry to solve problems, including bearings and angles of elevation and depression
MA5-TRG-P-01	applies Pythagoras' theorem and trigonometry to solve 3-dimensional problems and applies the sine, cosine and area rules to solve 2-dimensional problems, including bearings
MA5-TRG-P-02	establishes and applies the properties of trigonometric functions and finds solutions to trigonometric equations
MA5-PRO-C-01	solves problems involving probabilities in multistage chance experiments and simulations
MA5-PRO-P-01	solves problems involving Venn diagrams, 2-way tables and conditional probability
MA5-DAT-C-02	compares and analyses datasets using summary statistics and graphical representations
MA5-LOG-P-01	establishes and applies the laws of logarithms to solve problems
MA5-POL-P-01	defines, operates with and graphs polynomials and applies the factor and remainder theorems to solve problems

Mathematics – Year 9 Numeracy

Assessment Approach and Requirements

There will be FOUR different forms of assessment:

- Term 1 In-Class Test
- Term 2 Half Yearly Examination
- Term 3 Project-Based Learning
- Term 4 Final Examination

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3	Task 4
Date		Term 1 Week 5	Term 2 Week 6	Term 3 Week 5	Term 4 Week 4/5
Type of Task (In-Class/Submission)		In-Class Test	Half Yearly Examination	Project-Based Learning	Final Examination
Outcomes Assessed		MA5-IND-C-01 MA5-MAG-C-01 MA4-ALG-C-01 MA4-EQU-C-01 MA5-ALG-C-01 MA5-EQU-C-01	MA5-IND-C-01 MA5-MAG-C-01 MA4-ALG-C-01 MA4-EQU-C-01 MA5-ALG-C-01 MA5-EQU-C-01 MA4-LIN-C-01 MA5-LIN-C-01 MA5-LIN-C-02 MA5-TRG-C-01	MA5-FIN-C-01 MA5-FIN-C-02	All Term 1, 2 and 3 Outcomes + MA4-DAT-C-02 MA5-PRO-C-01 MA5-DAT-C-01 MA4-ARE-C-01 MA5-ARE-C-01 MA5-VOL-C-01
Working Mathematically		MAO-WM-01	MAO-WM-01	MAO-WM-01	MAO-WM-01
Understanding, Fluency and Communicating	50%	7.5%	15%	7.5%	20%
Problem Solving, Reasoning and Justification	50%	7.5%	15%	7.5%	20%
Total	100%	15%	30%	15%	40%

Course Outcomes

MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly
MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA4-ALG-C-01	generalises number properties to operate with algebraic expressions including expansion and factorisation
MA4-EQU-C-01	solves linear equations of up to 2 steps and quadratic equations of the form $ax^2 = c$
MA5-ALG-C-01	simplifies algebraic fractions with numerical denominators and expands algebraic expressions
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA4-LIN-C-01	creates and displays number patterns and finds graphical solutions to problems involving linear relationships
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools
MA5-LIN-C-02	graphs and interprets linear relationships using the gradient/slope-intercept form
MA4-PYT-C-01	applies Pythagoras' theorem to solve problems in various contexts
MA5-TRG-C-01	applies trigonometric ratios to solve right-angled triangle problems

MA5-FIN-C-01	solves financial problems involving simple interest, earning money and spending money
MA5-FIN-C-02	solves financial problems involving compound interest and depreciation
MA4-DAT-C-02	analyses simple datasets using measures of centre, range and shape of the data
MA5-PRO-C-01	solves problems involving probabilities in multistage chance experiments and simulations
MA5-DAT-C-01	compares and analyses datasets using summary statistics and graphical representations
MA4-ARE-C-01	applies knowledge of area and composite area involving triangles, quadrilaterals and circles to solve problems
MA5-ARE-C-01	solves problems involving the surface area of right prisms and practical problems involving the area of composite shapes and solids
MA5-VOL-C-01	Solves problems involving the volume of composite solids consisting of right prisms and cylinders

Mathematics – Year 9 Pathway to Advanced

Assessment Approach and Requirements

There will be FOUR different forms of assessment:

- Term 1 In-Class Test
- Term 2 Half Yearly Examination
- Term 3 Project-Based Learning
- Term 4 Final Examination.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3	Task 4
Date		Term 1 Week 5	Term 2 Week 6	Term 3 Week 5	Term 4 Week 4/5
Type of Task (In-Class/Submission)		In-Class Test	Half Yearly Examination	Project-Based Learning	Final Examination
Outcomes Assessed		MA5-IND-C-01 MA5-IND-P-01,02 MA5-MAG-C-01 MA5-ALG-C-01 MA5-EQU-C-01 MA5-EQU-P-01,02	All Term 1 Outcomes + MA5-LIN-C-01,02 MA5-LIN-P-01 MA5-TRG-C-01,02	MA5-FIN-C-01,02	All Term 1, 2 and 3 Outcomes + MA5-ALG-P-01,02 MA5-PRO-C-01 MA5-DAT-C-01 MA5-ARE-C-01 MA5-ARE-P-01 MA5-VOL-C-01 MA5-VOL-P-01
Working Mathematically		MAO-WM-01	MAO-WM-01	MAO-WM-01	MAO-WM-01
Understanding, Fluency and Communicating	50%	7.5%	15%	7.5%	20%
Problem Solving, Reasoning and Justification	50%	7.5%	15%	7.5%	20%
Total	100%	15%	30%	15%	40%

Course Outcomes

MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly
MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-IND-P-01	applies the index laws to operate with algebraic expressions involving negative-integer indices
MA5-IND-P-02	describes and performs operations with surds and fractional indices
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA5-ALG-C-01	simplifies algebraic fractions with numerical denominators and expands algebraic expressions
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA5-EQU-P-01	solves monic quadratic equations, linear inequalities and cubic equations of the form $ax^3=k$
MA5-EQU-P-02	solves linear equations of more than 3 steps, monic and non-monic quadratic equations, and linear simultaneous equations
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools
MA5-LIN-C-02	graphs and interprets linear relationships using the gradient/slope-intercept form
MA5-LIN-P-01	describes and applies transformations, the midpoint, gradient/slope and distance formulas, and equations of lines to solve problems

MA5-TRG-C-01	applies trigonometric ratios to solve right-angled triangle problems
MA5-TRG-C-02	applies trigonometry to solve problems, including bearings and angles of elevation and depression
MA5-FIN-C-01	solves financial problems involving simple interest, earning money and spending money
MA5-FIN-C-02	solves financial problems involving compound interest and depreciation
MA5-ALG-P-01	simplifies algebraic fractions involving indices, and expands and factorises algebraic expressions
MA5-ALG-P-02	selects and applies appropriate algebraic techniques to operate with algebraic fractions, and expands, factorises and simplifies algebraic expressions
MA5-PRO-C-01	solves problems involving probabilities in multistage chance experiments and simulations
MA5-DAT-C-01	compares and analyses datasets using summary statistics and graphical representations
MA5-ARE-C-01	solves problems involving the surface area of right prisms and practical problems involving the area of composite shapes and solids
MA5-ARE-P-01	applies knowledge of the surface area of right pyramids and cones, spheres and composite solids to solve problems
MA5-VOL-C-01	solves problems involving the volume of composite solids consisting of right prisms and cylinders
MA5-VOL-P-01	applies knowledge of the volume of right pyramids, cones and spheres to solve problems involving related composite solids

Mathematics – Year 9 Pathway to Standard

Assessment Approach and Requirements

There will be FOUR different forms of assessment:

- Term 1 In-Class Test
- Term 2 Half Yearly Examination
- Term 3 Project-Based Learning
- Term 4 Final Examination.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3	Task 4
Date		Term 1 Week 5	Term 2 Week 6	Term 3 Week 5	Term 4 Week 4/5

Problem Solving, Reasoning and Justification	50%	7.5%	15%	7.5%	20%
Total	100%	15%	30%	15%	40%

Course Outcomes

MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly
MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-IND-P-01	applies the index laws to operate with algebraic expressions involving negative-integer indices
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA5-ALG-C-01	simplifies algebraic fractions with numerical denominators and expands algebraic expressions
MA5-ALG-P-01	simplifies algebraic fractions involving indices, and expands and factorises algebraic expressions
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools
MA5-LIN-C-02	graphs and interprets linear relationships using the gradient/slope-intercept form
MA5-TRG-C-01	applies trigonometric ratios to solve right-angled triangle problems
MA5-TRG-C-02	applies trigonometry to solve problems, including bearings and angles of elevation and depression
MA5-FIN-C-01	solves financial problems involving simple interest, earning money and spending money
MA5-FIN-C-02	solves financial problems involving compound interest and depreciation
MA5-PRO-C-01	solves problems involving probabilities in multistage chance experiments and simulations

MA5-DAT-C-01	compares and analyses datasets using summary statistics and graphical representations
MA5-ARE-C-01	solves problems involving the surface area of right prisms and practical problems involving the area of composite shapes and solids
MA5-ARE-P-01	applies knowledge of the surface area of right pyramids and cones, spheres and composite solids to solve problems
MA5-VOL-C-01	solves problems involving the volume of composite solids consisting of right prisms and cylinders
MA5-VOL-P-01	applies knowledge of the volume of right pyramids, cones and spheres to solve problems involving related composite solids

Music – Stage 5

Assessment Approach and Requirements

Assessment is based on students' development of knowledge, understanding, and skills across the focus areas of Performing, Listening, and Composing. These focus areas are applied throughout the three content groups: Music in Practice, Music in Context, and the Elements of Music.

Through this integrated approach, students demonstrate their learning in the Elements of Music by engaging in performance, composition, and listening tasks.

Assessment Schedule

Course Component	Syllabus Weighting	Task 1	Task 2	Task 3	Task 4
Date		Term 1 Week 9	Term 2 Week 6	Term 3 Week 8	Term 4 Week 4/5
Type of Task (In-Class/Submission)		Submission: Composition	Half Yearly Examination	In-Class: Performance	Yearly Examination
Outcomes Assessed		MU5-COM-01	MU5-LIS-01 MU5-LIS-02	MU5-PER-01 MU5-PER-02	MU5-LIS-01 MU5-LIS-02
Performance	40%			40%	
Composition	30%	30%			
Listening	30%		15%		15%
Total	100%	30%	15%	40%	15%

Course Outcomes

Performing	
MU5-PER-01	performs repertoire with stylistic awareness and musical expression
MU5-PER-02	manipulates and combines the elements of music in performance to communicate musical ideas
Listening	
MU5-LIS-01	uses listening skills to analyse music in relation to stylistic, cultural, historical and social contexts
MU5-LIS-02	uses listening skills to evaluate how the elements of music are manipulated and combined
Composing	
MU5-COM-01	improvises, arranges or composes with stylistic understanding and musical expression
MU5-COM-02	manipulates and combines the elements of music to create musical ideas

Assessment Approach and Requirements

PDHPE plays a key role in promoting physical activity, health, well-being and developing competency in movement skills. Stage 5 PDHPE allows students to further develop practical skills and explore how decisions and choices may influence their life in the present and future.

The topics covered in Year 9 will cover:

- Health Wellbeing and Relationships
- Healthy Safe and Active Lifestyles
- Movement Skills and Performance

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3
Date		Term 1 Week 5	Term 3 Week 7	Term 4 Week 2
Type of Task (In-Class/Submission)		Submission: Forum	In-Class: Performance	In-Class: Tactical Learning
Outcomes Assessed		PD5-1, PD5-3, PD5-2 PD5-9, PD5-10	PD5-4, PD5-5, PD5-8, PD5-11	PD5-4, PD5-5, PD5-6, PD5-7, PD5-8, PD5-11
Health, Wellbeing and Relationships	25%	25%		
Healthy, Safe and Active Lifestyles	30%	10%	10%	10%
Movement, Skill and Performance	45%		25%	20%
Total	100%	35%	35%	30%

Course Outcomes

PD5-1	assesses their own and others' capacity to reflect on and respond positively to challenges
PD5-2	researches and appraises the effectiveness of health information and support services available in the community
PD5-3	analyses factors and strategies that enhance inclusivity, equality and respectful relationships
PD5-4	adapts and improvises movement skills to perform creative movement across a range of dynamic physical activity contexts
PD5-5	appraises and justifies choices of actions when solving complex movement challenges
PD5-6	critiques contextual factors, attitudes and behaviours to effectively promote health, safety, wellbeing and participation in physical activity
PD5-7	plans, implements and critiques strategies to promote health, safety, wellbeing and participation in physical activity in their communities
PD5-8	designs, implements and evaluates personalised plans to enhance health and participation in a lifetime of physical activity
PD5-9	assesses and applies self-management skills to effectively manage complex situations
PD5-10	critiques their ability to enact interpersonal skills to build and maintain respectful and inclusive relationships in a variety of groups or contexts
PD5-11	refines and applies movement skills and concepts to compose and perform innovative movement sequences

Photographic and Digital Media – Stage 5

Assessment Approach and Requirements

Assessment in Photographic and Digital Media Stage 5 encompasses both Artmaking as well as the understanding and application of Art History & Criticism components in the course. Students will be assessed on the creative work they undertake as well as their engagement and understanding of our studies of artist and their artmaking.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3	Task 4
Date		Term 1 Week 9	Term 2 Week 10	Term 3 Week 8	Term 4 Week 4/5
Type of Task (In-Class/Submission)		Submission: Series of Photographic Images	Submission: Photographic Competition and Extended Response	In-Class: Black and White Photographic Series and in-class Analysis	Final Examination
Outcomes Assessed		PDM5-MAK-5.1, PDM5-MAK-5.4, PDM5-MAK-5.6	PDM5-MAK-5.1, PDM5-MAK-5.3, PDM5-CH1-5.4, PDM5-CH1-5.6, PDM5-CH1-5.7, PDM5-CH1-5.9	PDM5-MAK-5.1, PDM5-MAK-5.2, PDM5-MAK-5.5, PDM5-MAK-5.6, PDM5-CH1-5.7 PDM5-CH1-5.8	PDM5-CH1-5.7, PDM5-CH1-5.8, PDM5-CH1-5.9, PDM5-CH1-5.10
Artmaking	60%	20%	20%	20%	
Art History and Criticism	40%		10%	10%	20%
Total	100%	20%	30%	30%	20%

Course Outcomes

PDM5-MAK-5.1	develops range and autonomy in selecting and applying photographic and digital conventions and procedures to make photographic and digital works.
PDM5-MAK-5.2	makes photographic and digital works informed by their understanding of the function and relationships between artist-artwork-world-audience.
PDM5-MAK-5.3	makes photographic and digital works informed by an understanding of how the frames affect meaning.
PDM5-MAK-5.4	investigates the world as a source of ideas, concepts and subject matter for photographic and digital works.
PDM5-MAK-5.5	makes informed choices to develop and extend concepts and different meanings in their photographic and digital works.
PDM5-MAK-5.6	selects appropriate procedures and techniques to make and refine photographic and digital works.
PDM5-CH1-5.7	applies their understanding of aspects of practice to critically and historically interpret photographic works.
PDM5-CH1-5.8	uses their understanding of the function and relationships between artist-artwork-world-audience in critical and historical interpretations of photographic and digital works.
PDM5-CH1-5.9	uses the frames to make different interpretations of photographic and digital works.
PDM5-CH1-5.10	constructs different critical and historical accounts of photographic and digital works.

Physical Activity and Sports Studies (PASS) – Stage 5

Assessment Approach and Requirements

The study of Physical Activity and Sports Studies (PASS) gives students the opportunity to explore the many possible contexts in which individuals can build activity into their lifestyle. Outcomes will be assessed through a class test, an examination, an oral presentation and a practical demonstration.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3
Date		Term 1 Week 9	Term 2 Week 7	Term 4 Week 2
Type of Task (In-Class/Submission)		In-Class Test	In-Class: Practical Assessment	In-Class: Oral Presentation
Outcomes Assessed		PASS 5.3, PASS5.4, PASS 5.6, PASS 5.7, PASS 5.10	PASS 5.1, PASS 5.2, PASS 5.6, PASS 5.7, PASS 5.8, PASS 5.9	PASS 5.5, PASS 5.7, PASS 5.9, PASS 5.10
Foundations of Physical Activity	40%	10%	25%	5%
Physical Activity and Sport in Society	20%	5%	5%	10%
Enhancing Participation and Performance	40%	20%	5%	15%
Total	100%	35%	35%	30%

Course Outcomes

PASS 5.1	discusses factors that limit and enhance the capacity to move and perform
PASS 5.2	analyses the benefits of participation and performance in physical activity and sport
PASS 5.3	discusses the nature and impact of historical and contemporary issues in physical activity and sport
PASS 5.4	analyses physical activity and sport from personal, social and cultural perspectives
PASS 5.5	demonstrates actions and strategies that contribute to active participation and skilful performance
PASS 5.6	evaluates the characteristics of participation and quality performance in physical activity and sport
PASS 5.7	works collaboratively with others to enhance participation, enjoyment and performance
PASS 5.8	displays management and planning skills to achieve personal and group goals
PASS 5.9	performs movement skills with increasing proficiency
PASS 5.10	analyses and appraises information, opinions and observations to inform physical activity and sport decisions.

Science

Assessment Approach and Requirements

Assessment Types will reflect the course components and weightings prescribed by NESA in the Syllabus and support documentation.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3	Task 4
Date		Term 2 Week 1	Term 2 Week 6	Term 3 Week 7	Term 4 Week 4/5
Type of Task (In-Class/Submission)		In-Class Energy Summit:	Half Yearly Examination	Depth Study with an in-class component	Final Examination
Outcomes Assessed		SC5-EGY-01, SC5-WS-01, SC5-WS-05, SC5-WS-06, SC5-WS-08	SC5-EGY-01, SC5-DIS-01, SC5-WS-05, SC5-WS-06, SC5-WS-07, SC5-WS-08	SC5-MAT-01, SC5-WS-07, SC5-WS-08	SC5-EGY-01, SC5-DIS-01, SC5-MAT-01, SC5-ENV-01, SC5-WS-05, SC5-WS-06, SC5-WS-07, SC5-WS-08
Knowledge and understanding	50%	10%	15%	10%	15%
Skills	50%	15%	10%	15%	10%
Total	100%	25%	25%	25%	25%

Course Outcomes

Skills	
SC5-WS-01	selects and uses scientific tools and instruments for accurate observations
SC5-WS-02	develops questions and hypotheses for scientific investigation
SC5-WS-03	designs safe, ethical, valid and reliable investigations
SC5-WS-04	follows a planned procedure to undertake safe, ethical, valid and reliable investigations
SC5-WS-05	selects and uses a range of tools to process and represent data
SC5-WS-06	analyses data from investigations to identify trends, patterns and relationships, and draws conclusions
SC5-WS-07	selects suitable problem-solving strategies and evaluates proposed solutions to identified problems
SC5-WS-08	communicates scientific arguments with evidence, using scientific language and terminology in a range of communication forms
Knowledge and Understanding	
SC5-EGY-01	evaluates current and alternative energy use based on ethical and sustainability considerations
SC5-DIS-01	explains how an understanding of the causes of disease can be used to prevent and manage the spread of disease
SC5-MAT-01	assesses the uses of materials based on their physical and chemical properties
SC5-ENV-01	analyses the impact of human activity on the natural world
SC5-GEV-01	describes the relationship between the diversity of living things and the theory of evolution
SC5-GEV-02	explains how DNA is responsible for the transmission of heritable characteristics and can be manipulated through genetic technologies
SC5-RXN-01	describes a range of reaction types
SC5-RXN-02	explains the factors that affect the rate of chemical reactions
SC5-WAM-01	describes the features and applications of different forms of waves
SC5-WAM-02	explains the motion of objects using Newton's laws of motion
SC5-DA2-01	assesses the use of scientific knowledge and data in evidence-based decisions and when verifying the legitimacy of claims

Textiles Technology – Stage 5

Assessment Approach and Requirements

Students will be assessed through a combination of Practical projects completed In-Class, Design folio work and an Examination. The major emphasis of the Textiles Technology syllabus allows students to learn about the Areas of study through practical experiences and project-based learning. Textile projects from a variety of Focus areas are produced, including Furnishings, Apparel, Textile Art and Non-apparel. The content from the Areas of study (Design, Properties and Performance of Textiles and Textiles and Society) are integrated throughout the course. Practical projects afford students the opportunity to develop skills in design, research, communication, planning, manufacture, and evaluation. Students learn to select and safely use a range of textile tools and materials. They will develop skills by producing illustrations and testing materials and techniques. Design folios are used to drive and support the design process and the manufacture of practical projects. Both written and visual communication form an important part of Design folios.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3
Date		Term 1 Week 9	Term 3 Week 9	Term 4 Week 4/5
Type of Task (In-Class/Submission)		Furnishings Design folio & practical project (cushion)	Apparel Design folio & practical project (garment)	Yearly Exam
Outcomes Assessed		TEX 5.4, TEX 5.8, TEX 5.9, TEX 5.11, TEX 5.12	TEX 5-1, TEX 5-2, TEX 5.5, TEX 5-8, TEX 5-10	TEX 5-1, TEX 5-2, TEX 5-3, TEX 5-5, TEX 5-6, TEX 5-7, TEX 5-10, TEX 5-12
Knowledge	25%			25%
Design folio	30%	15%	15%	
Practical project	45%	20%	25%	
Total	100%	35%	40%	25%

Course Outcomes

TEX 5.1	explains the properties and performance of a range of textile items
TEX 5.2	justifies the selection of textile materials for specific end uses
TEX 5.3	explains the creative process of design used in the work of textile designers
TEX 5.4	generates and develops textile design ideas
TEX 5.5	investigates and applies methods of colouration and decoration for a range of textile items
TEX 5.6	analyses the influence of historical, cultural and contemporary perspectives on textile design, construction and use
TEX 5.7	evaluates the impact of textiles production and use on the individual consumer and society
TEX 5.8	selects and uses appropriate technology to creatively document, communicate and present design and project work
TEX 5.9	critically selects and creatively manipulates a range of textile materials to produce quality textile items
TEX 5.10	selects appropriate techniques and uses equipment safely in the production of quality textile projects
TEX 5.11	demonstrates competence in the production of textile projects to completion
TEX 5.12	evaluates textile items to determine quality in their design and construction

Visual Arts – Stage 5

Assessment Approach and Requirements

Assessment in Stage 5 Visual Arts / Year 9 & 10 comprises of Artmaking 60% and Art History 40%.

Assessment Schedule

Course Components	Syllabus Weighting	Task 1	Task 2	Task 3	Task 4
Date		Term 1 Week 9	Term 2 Week 8	Term 3 Week 8	Term 4 Week 4/5
Type of Task (In-Class/Submission)		Submission: Gestural Sculpture & VAPD	Submission and In-Class: Series of Renderings & Short Answer Analysis	Submission: Ceramics & VAPD	Final Examination
Outcomes Assessed		VA5-AM-5.1, VA5-AM-5.2 VA5-AM-5.4 VA5-AM-5.6 VA5-CH-5.7	VA5-CH-5.2 VA5-CH-5.3 VA5-CH-5.6 VA5-CH-5.10	VA5-CH-5.5 VA5-CH-5.6 VA5-CH-5.9	VA5-CH-5.7 VA5-CH-5.8 VA5-CH-5.9 VA5-CH-5.10
Artmaking	60%	20%	20%	20%	
Art History & Criticism	40%	5%	10%	5%	20%
Total	100%	25%	30%	25%	20%

Course Outcomes

VA5-AM-5.1	develops range and autonomy in selecting and applying visual arts conventions and procedures to make artworks.
VA5-AM-5.2	makes artworks informed by their understanding of the function of and relationships between the artist-artwork-world-audience
VA5-AM-5.3	makes artworks informed by an understanding of how the frames affect meaning.
VA5-AM-5.4	investigates the world as a source of ideas, concepts and subject matter in the visual arts.
VA5-AM-5.5	makes informed choices to develop and extend concepts and different meanings in their artworks.
VA5-AM-5.6	demonstrates developing technical accomplishment and refinement in making artworks.
VA5-CH-5.7	applies their understanding of aspects of practice to critical and historical interpretations of art.
VA5-CH-5.8	uses their understanding of the function of and relationships between artist-artwork-world-audience in critical and historical interpretations of art.
VA5-CH-5.9	demonstrates how the frames provide different interpretations of art.
VA5-CH-5.10	demonstrates how art criticism and art history construct meanings.

Glossary

Glossary of Key Assessment words as defined by NESA

Account	Account for: state reasons for, report on. Give and account of: narrate a series of events or transactions.
Analyse	Identify components and the relationship between them: draw out and relate implications
Apply	Use, utilise, and employ in a particular situation
Appreciate	Make a judgement about the value of
Assess	Make a judgement of value, quality, outcomes, results or size
Calculate	Ascertain/determine from given facts, figures or information
Clarify	Make clear or plain
Classify	Arrange or include In-Classes/categories
Compare	Show how things are similar or different
Construct	Make; build; put together items or arguments
Contrast	Show how things are different or opposite
Critically (analyse/evaluate)	Add a degree or level of accuracy; depth, knowledge and understanding, logic, questioning, reflection and quality to (analysis/evaluation)
Deduce	Draw conclusions
Define	State meaning and identify essential qualities
Demonstrate	Show by example
Describe	Provide characteristics and features
Discuss	Identify issues and provide points for/or against
Distinguish	Recognise and note/indicate as being distinct or different from; to note differences between
Evaluate	Make a judgement based on criteria
Examine	Inquire into
Explain	Relate cause and effect; make the relationships between things evident; Provide why and/or how
Extract	Choose relevant and/or appropriate details
Extrapolate	Infer from what is known
Identify	Recognise and name
Interpret	Draw meaning from
Investigate	Plan, inquire into and draw conclusions about
Justify	Support an argument or conclusion
Outline	Sketch in general terms; indicate the main features of
Predict	Suggest what may happen based on available information
Propose	Put forward (for example a point of view, idea, argument, suggestion) for consideration of action
Recall	Present remembered ideas, facts or experiences
Recommended	Provide reasons in favour
Recount	Retell a series of events
Summarise	Express, concisely, the relevant details
Synthesise	Putting together various elements to make a whole

The following pages are sample copies of forms you may need throughout the Stage 5 course.

Late Assessment Task Application: Misadventure Form

Students are to use this form when they have been unable to submit an assessment task or sit an examination by the due date due to a misadventure.

1. Students must complete the form and email a copy to the relevant teacher PLUS Secondary Absent secondaryabsent@nwcc.nsw.edu.au for consideration as soon as practical.
2. If approval is granted, the student must acknowledge the revised due date and note it in their diary.
3. The teacher will record the revised date on Edumate.
4. Students will be expected to complete/submit their task by the revised date and time, as advised by the teacher.
5. If the revised date is missed the standard consequences will apply for a late task, i.e N-Determination Warning
6. If the task is an Examination, a resit may not be possible. The student may be required to complete the task at home and submit for outcome achievement and feedback. Results will be recorded as N/A on semester reports.

For a detailed overview please consult the Assessment Guidelines in the student Assessment Handbook.

Student Section (Please fill out all details)

Student Name: _____ Teacher: _____

Today's Date: _____ Original Due Date: _____

Task name and details: _____

Reason for non-submission / completion on time: _____

By submitting this application, the student is seeking the following consideration:

Additional documentation of evidence is attached to this application: YES / NO

This is a true and valid account:

Student signature: _____ Date: _____

Parent/Guardian signature: _____ Date: _____
